Definitions of Notes

We use the following symbols and conventions throughout this User's Guide:

 CAUTION	CAUTION indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injuries.
IMPORTANT	IMPORTANT indicates a potentially hazardous situation which, if not avoided, may result in damage to property or loss of product functionality.
NOTE	NOTE specifies the operating environment, conditions for installation, or special conditions of use.
	Tips icons indicate helpful hints and supplementary information.
Bold	Bold style identifies buttons on the machine's control panel or computer screen.
<i>Italics</i>	Italicised style emphasises an important point or refers you to a related topic.
(ADS-4700W/ADS-4900W) Courier New	Courier New font identifies messages shown on the machine's LCD.

Important Note

- The latest manuals are available at support.brother.com/manuals.
- Check support.brother.com for Brother driver and software updates.
- To keep your machine performance up to date, check support.brother.com for the latest firmware upgrade. Otherwise, some of your machine's functions may not be available.
- Do not use this product outside the country of purchase as it may violate the wireless telecommunication and power regulations of that country.
- When replacing or disposing of your machine, Brother strongly recommends resetting it to its factory settings to remove all personal information.
- Not all models are available in all countries.
- In this *User's Guide*, illustrations of the ADS-4300N are used, unless otherwise specified.
- The screens in this *User's Guide* are for illustration purposes only and may differ from the actual screens.
- Unless otherwise specified, the screens in this manual are from Windows 10 and macOS v11.0.x. Screens on your computer may vary depending on your operating system.
- The contents of this guide and the specifications of this product are subject to change without notice.

Related Information

- [Introduction to Your Brother Machine](#)

Set Up Your Scanner

1. Attach the ADF firmly until it locks into place.

2. Pull the Extendable Tray from the ADF.

3. Extend the Output Tray to match the length of the document pages.

- (ADS-4900W) For Legal size documents, press the release button (1), and then extend the Output Tray. (Legal size paper is not available in some regions.)

- If the Output Tray is even slightly longer than the document size, pages may not be in their original order when you retrieve them from the Output Tray.

4. Lift and unfold the Document Stopper (1).

CAUTION

Do not use the ADF as a handle to carry the scanner.

Control Panel Overview

>> ADS-4300N

>> ADS-4700W/ADS-4900W

ADS-4300N

1. Document Separation Switch

 (Manual Single Mode) /  (Continuous Feed Mode)

Slide to select the scanner feed mode.

2. Error Indicator (with LED)

Blinks when the machine detects an error.

3. (Power On/Off) (with LED)

Press  to turn the machine on.

Press and hold  to turn the machine off.

4. (Stop)

Press to stop or cancel your current action and return to Ready Mode.

5. (Scan to USB)

Press to scan to a USB flash drive.

6. (Scan to PC)

Press to scan to the computer.

Install a scanning application (for example, Brother iPrint&Scan) and configure the settings within the application before scanning from the machine.

7. Network Device Scan Buttons

Press one of these shortcut buttons to perform a "Scan to" function, after you have assigned it.

You can assign one of these "Scan to" functions to use it as a shortcut.

- Scan to FTP/SFTP
- Scan to Network
- Scan to PC (Network Connect)
- WS Scan

ADS-4700W/ADS-4900W

1. Document Separation Switch

 (Manual Single Mode) /  (Continuous Feed Mode)

Slide to select the scanner feed mode.

2. (Back)

Press to go back to the previous screen or menu.

3. (Home Button)

Press to return to the Home Screen and Ready Mode.

4. (Power On/Off) (with LED)

Press  to turn the machine on.

Press and hold  to turn the machine off. The LCD displays [Shutting Down] and stays on for a few seconds before turning off.

5. (Stop)

Press to stop or cancel your current action and return to Ready Mode.

6. Touchscreen LCD

Access the menus and options by pressing the touchscreen.

Assign the Scan Functions to Network Device Scan Buttons 1-3

Related Models: ADS-4300N

Assign the following scan to network functions to each Network Device Scan Button if you want to use them as shortcut buttons:

- Scan to FTP/SFTP
 - Scan to Network
 - Scan to PC (Network Connect)
 - WS Scan
1. Start your web browser.
 2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
For example:
https://192.168.1.2
 3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Scan > Scan to Network Device**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Under **Network Device1**, click the **Type** drop-down menu and select the scan function you want to assign to Network Device Scan Button 1.
6. Select a profile name from the **Destination** drop-down list.
7. Repeat these steps to configure Network Device Scan Buttons 2 and 3.
8. Click **Submit**.

Home Screens

Your machine has eight tabbed screens (referred to as Home screens). Each Home screen can hold up to eight icons which can be used for functions, machine settings and shortcuts. A total of 57 icons can be placed on the Home screens as needed.

The Main Home screen can be selected from the Home screens.

Use the [Admin Settings] menu to group names on the tabs and rearrange the icons.

1. Date & Time

Displays the date and time set on the machine.
This area is also used to display error or maintenance messages.

2. (Wi-Fi Direct Status)

Press to configure Wi-Fi Direct settings.
The following icons show the Wi-Fi Direct status:

	- Your machine is not connected to the Wi-Fi Direct network. Press this icon to configure Wi-Fi Direct settings. - The Wi-Fi Direct setting is disabled.
	Your machine is connected to the Wi-Fi Direct network.
	The Wi-Fi Direct network cannot be detected.

3. (Wireless Status)

Each icon in the following table shows the wireless network status:

	- Your machine is not connected to the wireless access point/router. Press this icon to configure wireless settings. For more detailed information, see the <i>Quick Setup Guide</i>. - The wireless setting is disabled.
	The wireless network is connected. A three-level indicator in each of the Home screens displays the current wireless signal strength.
	The wireless access point/router cannot be detected.

You can configure wireless settings by pressing the Wireless Status button.

4. (Admin Settings)

Press to access the [Admin Settings] menu.

NOTE

If required, enter the password you use to manage this machine in Web Based Management, and then press [OK].

5. Function Icons, Setting Icons and Shortcut Icons

The following descriptions explain basic icons and features. The available features vary depending on your model.

-  ([Settings])
Press to access the Settings menu.
-  ([to PC])
Press to access the Scan to PC function.
-  ([to Network])
Press to access the Scan to Network function.
-  ([to FTP/SFTP])
Press to access the Scan to FTP/SFTP function.
-  ([to Workflow])
Press to access the Scan to Workflow function.

Settings must be configured in iPrint&Scan in advance.

-  ([to Email Server])
Press to access the Scan to Email Server function.
-  ([to SharePoint])
Press to access the Scan to SharePoint function.
-  ([to USB])
Press to access the Scan to USB function.
-  ([to Web])
Press to connect your machine to an Internet service.

-  ([Apps])

Press to connect your machine to the Brother Apps service.

-  (Shortcuts)

Press to create Shortcuts for frequently used operations such as Scan to PC, Scan to Email Server, Scan to USB, or other functions.

You can quickly scan using the options set as Shortcuts.

6. Tabs Scroll Buttons

Press to display and access all the tabs.

7. Home Tabs

Press to display the Home screen.

- If an error message or notification appears in the information bar, press the message area to view the details.

- The warning icon  appears when there is an error or maintenance message.
- The information icon  appears when there are helpful hints or supplementary information available.
- This product adopts the font of ARPHIC TECHNOLOGY CO., LTD.

Auto Start Scan

The Auto Start Scan feature allows you to start scanning automatically as soon a document is placed in the ADF. To use Auto Start Scan, you must first create an Auto Start Scan Shortcut and then enable the Auto Start Scan setting in General Setup:

1. Press  to display the [Custom 6] tab, and press it.
2. Press  to add the Auto Start Scan Shortcut.
3. Select the Shortcut function (for example, Scan to PC).
4. Press [Save as Shortcut]. When the LCD displays [These settings will be saved as a shortcut.], press [OK].
5. Enter the Shortcut Name and press [OK]. When the LCD displays [Make this a One Touch Shortcut?], press [OK].
6. Press  ([Settings]) to access the Settings menu. Press [General Setup] > [Auto Start Scan Mode] and select [On].

NOTE

Only one Auto Start Scan profile can be saved at a time.

Settings Menu

Press  ([Settings]) to check and access all the machine's settings.

- [General Setup]
Press to access the General Settings menu.
- [Shortcut Settings]
Press to set Shortcuts. This option is unavailable and cannot be selected if you have not added Shortcuts.
- [Network]
Press to access Network settings.
- [Machine Info.]
Press to check the machine's information.
- [Initial Setup]
Press to access the [Date and Time], [Reset], and [Local Language] menus.

Access Brother Utilities (Windows)

Brother Utilities is an application launcher that offers convenient access to all Brother applications installed on your computer.

1. Do one of the following:

- Windows 10

Click  > **Brother** > **Brother Utilities**.

- Windows 8.1

Move your mouse to the lower left corner of the **Start** screen and click  (if using a touch-based device, swipe up from the bottom of the **Start** screen to bring up the **Apps** screen).

When the **Apps** screen appears, tap or click  (**Brother Utilities**).

- Windows 7

Click  (**Start**) > **All Programs** > **Brother** > **Brother Utilities**.

2. Select your machine.

3. Select the operation you want to use.

Related Information

- [Introduction to Your Brother Machine](#)
 - [Uninstall the Brother Software and Drivers \(Windows\)](#)

Uninstall the Brother Software and Drivers (Windows)

1. Do one of the following:

- Windows 10

Click  > **Brother** > **Brother Utilities**.

- Windows 8.1

Move your mouse to the lower left corner of the **Start** screen and click  (if using a touch-based device, swipe up from the bottom of the **Start** screen to bring up the **Apps** screen).

When the **Apps** screen appears, tap or click  (**Brother Utilities**).

- Windows 7

Click  (**Start**) > **All Programs** > **Brother** > **Brother Utilities**.

2. Click the drop-down list, and then select your model name (if not already selected). Click **Tools** in the left navigation bar, and then click **Uninstall**.

Follow the instructions in the dialog box to uninstall the software and drivers.

- [Load Documents](#)

Document Specifications

- [Acceptable Documents](#)
- [Unacceptable Documents](#)
- [Carrier Sheet Recommendations](#)
- [Notes for Using Carrier Sheets](#)

Acceptable Documents

Do not load documents of varying page thickness or paper quality at the same time.

Standard Paper

Width	50.8 mm to 215.9 mm	
Length	50.8 mm to 355.6 mm	
Weight	ADS-4300N/ADS-4700W: 40 g/m ² to 200 g/m ² ADS-4900W: 25 g/m ² to 413 g/m ²	
Thickness	ADS-4300N/ADS-4700W: 0.08 mm to 0.28 mm ADS-4900W: 0.04 mm to 0.53 mm To scan thinner documents, use the optional Carrier Sheet.	
Maximum Number of Pages ¹	ADS-4300N/ADS-4700W: Up to 80 sheets ADS-4900W: Up to 100 sheets	
Standard Paper Size	A4	210 mm x 297 mm
	A5	148 mm x 210 mm
	A6	105 mm x 148 mm
	B5	182 mm x 257 mm
	B6	128 mm x 182 mm
	Legal	215.9 mm x 355.6 mm
	Mexican Legal	215.9 mm x 339.9 mm
	India Legal	215 mm x 345 mm
	Letter	215.9 mm x 279.4 mm
	Executive	184.1 mm x 266.7 mm
	Folio	215.9 mm x 330.2 mm

Plastic Card

Size (ISO)	85.60 mm x 53.98 mm
Material	Plastic (PET)
Type	Plastic card such as a store card.
Thickness	Up to 1.32 mm (with embossing) Up to 1.10 mm (without embossing)
Maximum Number of Cards	- ADS-4300N/ADS-4700W - One card (with embossing) - One card (without embossing) - ADS-4900W - One card (with embossing) - Five cards (without embossing)

Certain types of embossed cards may not scan correctly.

¹ When using 80 g/m² plain paper.

Related Information

- [Document Specifications](#)
-

Unacceptable Documents

The following types of documents may not be scanned successfully:

- Documents with a carbon sheet attached
- Documents written in pencil
- Documents of uneven thickness, such as envelopes
- Documents with large wrinkles or curls
- Documents that use tracing paper
- Documents that use coated paper
- Photographs (photographic paper)
- Documents printed on perforated paper
- Documents printed on unusually-shaped paper (not square or rectangle)
- Documents with photos, notes, or stickers affixed to them
- Documents that use carbonless paper
- Documents that use loose-leaf paper or any paper with holes in it
- Documents with paper clips or staples
- Documents with wet ink
- Fabrics, metallic sheets, or overhead projector sheets
- Glossy or mirrored media
- Documents that exceed recommended thicknesses

IMPORTANT

- Carbonless papers contain chemical substances that may damage the rollers (for example, the Pick Up Roller). If paper jams occur frequently, clean the Brake Roller and Pick Up Roller. The life of the Brake Roller and Pick Up Roller may be reduced compared to scanning paper with high wood content.
- When scanning paper with high wood content, the life of the Brake Roller and Pick Up Roller may be reduced compared to scanning wood-free paper.
- The Brake Roller and Pick Up Roller may become damaged when a photo or sticky note on the document touches these parts during scanning.
- The surface of the document may be damaged when scanning glossy papers such as photographs.
- The damage caused by using any unacceptable documents with your Brother machine may not be covered under warranty.

Automatic Document Feeder (ADF) Paper Capacity

>> ADS-4300N/ADS-4700W

>> ADS-4900W

ADS-4300N/ADS-4700W

The number of sheets that you can load in the ADF depends on the paper size and paper weight.

Capacity (Sheets) vs Paper Weight

	Paper Size	Paper Weight										
		g/m ²	40	52	64	75	80	90	104	127	157	200
Capacity (Sheets)	A4/Letter	-	80	80	80	80	80	72	62	50	41	32
	Legal	-	64	64	64	64	64	58	50	40	33	25

ADS-4900W

The number of sheets that you can load in the ADF depends on the paper size and paper weight.

Capacity (Sheets) vs Paper Weight

	Paper Size	Paper Weight													
		g/m²	25	40	52	64	75	80	90	104	127	157	209	256	413
Capacity (Sheets)	A4/ Letter	-	100	100	100	100	100	100	88	76	62	50	38	31	19
	Legal	-	80	80	80	80	80	80	70	61	50	40	30	25	15

Related Information

- [Unacceptable Documents](#)

Document Areas That Should Not Be Perforated

Avoid perforating or punching holes in the shaded area shown in the illustration. Doing so will cause a scanning error.

1. ADS-4900W: 45 mm
ADS-4300N/ADS-4700W: 80 mm
2. Top
3. Bottom
4. Centre
5. Feed direction
6. Front side
7. Reference point

- This condition applies when the document is set in the centre of the Pick Up Roller.
- If there are holes punched, or other paper taped or otherwise attached in the shaded area, multifeed detection may not be performed. For more information about multifeed detection, see *Related Information*.

Related Information

- [Unacceptable Documents](#)

Related Topics:

- [Multifeed Detection](#)

Multifeed Detection

Multifeed occurs when two or more sheets are fed through the ADF at the same time, or when different document lengths are detected.

Multifeed detection checks for overlapping documents, the length of documents, or both. The following conditions must be met to avoid triggering multifeed detection:

- ADS-4300N/ADS-4700W
 - All pages in the document loaded in the ADF must be the same weight.
Paper weight must be between 40 g/m² and 200 g/m².
 - The 80 mm area in the centre of the document must be free of perforations or holes, and must have no other documents attached to it.
 - The document must be placed in the centre of the Pick Up Roller.
 - All pages in the document must be wider than 80 mm.
- ADS-4900W
 - All pages in the document loaded in the ADF must be the same weight.
Paper weight must be between 35 g/m² and 413 g/m².
 - The 45 mm area in the centre of the document must be free of perforations or holes, and must have no other documents attached to it.
 - The document must be placed in the centre of the Pick Up Roller.

- Scanning thick documents such as plastic cards may incorrectly result in multifeed errors. If this happens, disable multifeed detection.
- A multifeed cannot be detected when the machine is set to  (Manual Single Mode).
- If the document paper are too thin or the width of the documents is too narrow, the sensor may not be able to detect a multifeed.

Related Information

- [Unacceptable Documents](#)

Scan a Mixed Batch

The following conditions apply when scanning a mixed batch of documents with different paper weights, friction coefficients, or sizes. Make sure to test a few sheets first to check if the documents can be scanned.

Paper direction

Align the direction of the paper fibre with the feed direction.

Paper weight

Use the following paper weights:

- ADS-4300N/ADS-4700W
40 g/m² to 200 g/m²
- ADS-4900W
25 g/m² to 413 g/m²

Friction coefficient

We recommend using the same type of paper from the same manufacturer. When papers of different manufacturers/brands are mixed, it affects the feeding performance as the difference in the friction coefficient increases.

We recommend using friction coefficients between 0.35 and 0.6 (reference value for paper friction coefficient).

Document position

Use paper sizes that fit the 45 mm width of the Pick Up Roller in the centre.

Paper size

When you scan a mixed batch with different sizes, not feeding the documents straight may cause problems, such as paper jams or part of the image to appear missing.

We recommend checking the documents thoroughly before scanning and also checking the image if the document was skewed.

When scanning a mixed batch with different sizes, documents are more likely to skew while feeding because the Paper Guides do not touch every sheet.

Documents that cannot be scanned in a mixed batch

The following types of documents cannot be mixed in the same batch:

- Carbonless paper
- Bond paper
- Perforated documents
- Thermal paper
- Carbon-backed paper
- OHP film
- Tracing paper
- Synthetic paper
- Bent or damaged documents
- Thin paper
 - ADS-4300N/ADS-4700W
Less than 40 g/m²
 - ADS-4900W
Less than 25 g/m²

How to scan a mixed batch

Load your document in the ADF in descending order of paper size with the largest at the back and the smallest at the front.

If you are loading a paper business card, load it horizontally.

Related Information

- [Unacceptable Documents](#)

Carrier Sheet Recommendations

Brother recommends using an optional Carrier Sheet to scan the following documents:

- Documents with a carbon sheet attached
- Documents written in pencil
- Documents narrower than 50.8 mm
- Documents shorter than 50.8 mm
- Pages thinner than 0.08 mm ¹
- Documents of uneven thickness, such as envelopes
- Documents with large wrinkles or curls
- Bent or damaged documents
- Documents that use tracing paper
- Documents that use coated paper
- Photographs (photographic paper)
- Documents printed on perforated paper
- Documents printed on unusually-shaped paper (not square or rectangle)
- Documents with photos, notes, or stickers attached to them
- Documents that use carbonless paper
- Documents that use loose-leaf paper or any paper with holes in it

CAUTION

To avoid cutting yourself, do not slide or scrape your hand or fingers along the edge of the Carrier Sheet.

IMPORTANT

- To avoid warping the Carrier Sheet, do not place the Carrier Sheet in direct sunlight or in an area subject to high temperatures and high humidity.
- To avoid damaging the Carrier Sheet, do not bend or pull it. Do not use a damaged Carrier Sheet, as it may produce incorrect scan results.

Related Information

- [Document Specifications](#)

Related Topics:

- [Replacement Supplies and Optional Accessories](#)

¹ (ADS-4900W) Use the Carrier Sheet when the document thickness is 0.04 mm or less.

Notes for Using Carrier Sheets

- To avoid document jams, do not load the optional Carrier Sheet upside down. See the instructions printed on the Carrier Sheet itself for more information.
- To avoid document jams, do not put several small documents into the Carrier Sheet at the same time. Insert only one document into the Carrier Sheet at a time.
- Do not write on the Carrier Sheet, as the writing may be seen in scanned documents. If the Carrier Sheet becomes dirty, wipe it with a dry cloth.
- Do not leave documents in the Carrier Sheet for extended periods of time; the printing on the documents may bleed through onto the Carrier Sheet.
- **If you use any of the Unacceptable Documents and damage your Brother machine, it may not be covered under warranty.**

Load Documents

The ADF can hold multiple pages and feeds each sheet individually. Use 80 g/m² paper and always fan the pages before placing them in the ADF.

IMPORTANT

- Make sure documents with ink or correction fluid are completely dry.
- DO NOT pull on the document while it is feeding.
- DO NOT use paper that is curled, wrinkled, folded, ripped, stapled, paper-clipped, pasted, or taped.
- DO NOT use cardboard or fabric.

-
- [Load Standard Size Documents](#)

 - [Load a Plastic Card](#)
 - [Load Documents Longer than Standard Size](#)
 - [Load Non-standard Size Documents](#)
 - [Load Envelopes and Multi-Layered Transfer Paper](#)
 - [Load Receipts, Clippings, Photos, and Other Documents](#)

Load Standard Size Documents

1. Make sure the Document Separation Switch is set to  (Continuous Feed Mode).

2. Gently adjust the Paper Guides (1) to fit the width of your document.

3. Fan the pages several times along both the long edge and the short edge.

4. Align the edges of the pages.

-
5. Place your document, *face down, top edge first* in the ADF between the Paper Guides until you feel it touch the inside of the machine. Feed thin pages slowly and carefully to keep the edge from being folded.

(ADS-4900W) For Legal size documents, press the release button (1), and then extend the Output Tray. (Legal size paper is not available in some regions.)

Related Information

- [Load Documents](#)
-

Load Business Cards

1. Make sure the Document Separation Switch is set to  (Continuous Feed Mode).

2. Gently adjust the Paper Guides (1) to fit the width of your document.

3. Place the card, *face down*, *top edge first* in the ADF between the Paper Guides until you feel it touch the inside of the machine.

You can load the following number of business cards at a time:
Up to 30 cards (total thickness less than 8 mm)

Related Information

- [Load Documents](#)

Load a Plastic Card

1. Make sure the Document Separation Switch is set to  (Continuous Feed Mode).

2. Gently adjust the Paper Guides (1) to fit the width of your document.

3. Place the card, *face down*, *top edge first* in the ADF between the Paper Guides until you feel it touch the inside of the machine.

- Load only one plastic card (with embossing) at a time.
- Certain types of plastic cards may be scratched when scanned.
- Rigid cards may not be fed correctly.
- If the surface of the card is dirty with grease marks (for example, fingerprints) or similar, wipe the dirt off before scanning.

Related Information

- [Load Documents](#)
-

Load Documents Longer than Standard Size

Make sure documents with ink or correction fluid are completely dry.

1. Make sure the Document Separation Switch is set to  (Continuous Feed Mode).

2. Gently adjust the Paper Guides (1) to fit the width of your document.

3. Place your document, *face down, top edge first* in the ADF between the Paper Guides until you feel it touch the inside of the machine.

- Load only one document at a time.
- Support the document with your hand if the document is longer than the extended ADF.

4. Close the Document Stopper (1).

Related Information

- [Load Documents](#)
-

Load Non-standard Size Documents

1. Slide the Document Separation Switch to the left and confirm that it is set to  (Manual Single Mode).

When the machine is in Manual Single Mode, Multifeed Detection is not available.

2. Fold your document in half, as shown.

3. Gently adjust the Paper Guides (1) to fit the width of your document.

4. Place your document, *face down, top edge first* in the ADF between the Paper Guides until you feel it touch the inside of the machine.

IMPORTANT

DO NOT slide the Document Separation Switch during scanning. Doing this may damage the machine.

NOTE

When finished, slide the Document Separation Switch to the right and confirm that it is set to  (Continuous Feed Mode).

Related Information

- [Load Documents](#)

Load Envelopes and Multi-Layered Transfer Paper

1. Slide the Document Separation Switch to the left and confirm that it is set to  (Manual Single Mode).

When the machine is in Manual Single Mode, Multifeed Detection is not available.

2. Gently adjust the Paper Guides (1) to fit the width of your envelope or transfer paper.

3. Place your envelope or transfer paper, *face down, top edge first* in the ADF between the Paper Guides until you feel it touch the inside of the machine.

IMPORTANT

DO NOT slide the Document Separation Switch during scanning. Doing this may damage the machine.

NOTE

When finished, slide the Document Separation Switch to the right and confirm that it is set to  (Continuous Feed Mode).

Related Information

- [Load Documents](#)
-

Load Receipts, Clippings, Photos, and Other Documents

- Make sure documents with ink or correction fluid are completely dry.
- A Carrier Sheet is required when scanning documents of irregular size. The Carrier Sheet is not included with your machine and must be ordered separately.

For more information, visit your local Brother website or contact your local Brother dealer.

1. Make sure the Document Separation Switch is set to  (Continuous Feed Mode).

2. Insert the document into the optional Carrier Sheet.

- Set the document in the centre of the Carrier Sheet and align the top edge of the document with the top edge of the Carrier Sheet.
- If the receipt is longer than the Carrier Sheet, you can fold the receipt in two places so that it overlaps when you insert it into the Carrier Sheet.

-
3. Adjust the Paper Guides (1) to fit the width of the Carrier Sheet.

4. Place the Carrier Sheet in the ADF between the Paper Guides until you feel it touch the inside of the machine.

Save Scanned Documents to a USB Flash Drive

To avoid damaging the drive or the data stored on the USB flash drive, DO NOT remove it while the machine is scanning to it.

>> [ADS-4300N](#)

>> [ADS-4700W/ADS-4900W](#)

ADS-4300N

1. Do one of the following:

- Windows

Launch  (**Brother Utilities**), and then click the drop-down list and select your model name (if not already selected). Click **Tools** in the left navigation bar, and then click **Remote Setup**.

- Mac

In the **Finder** menu bar, click **Go > Applications > Brother**, select your model name, and then double-click the **Brother Remote Setup** icon.

If the Discover Devices dialog box appears, select your model name and then click **Connect**.

If your machine is connected via a network, we recommend using Web Based Management to configure your scan settings.

2. Select **Scan to USB** in the navigation pane, and then configure scan settings as needed.

Windows

3. Click **OK** to close the Remote Setup window.
4. Insert a USB flash drive into the machine.
5. Load your document.
6. Press  (Scan to USB) on the control panel.

The machine starts scanning, and then the scanned data is saved on the USB flash drive.

ADS-4700W/ADS-4900W

1. Load your document.
2. Insert a USB flash drive into the machine.
The Scan to USB screen appears automatically. If the Scan to USB screen does not appear, press the [Basic 2] tab in the Home screen, and then press [to USB].
3. To change the scan settings, press [Options]. Configure the following settings:

Option	Description
2-sided Scan	When using 2-sided scanning, select 2-sided Scan: Long Edge so the layout of the data file's pages matches your original.
Colour Setting	Select the colour format for your document.
Resolution	Select the scan resolution for your document.
File Type	Select the file format for your document.
Document Size	Select your document size.

Option	Description
File Name	Rename the file.
File Name Style	Select the order in which the date, counter number, and other items appear in the file names.
File Size	Select the file size for your document.
Skip Blank Page	When On is selected, blank pages are skipped.
Multifeed Detection	Detect a multifeed error.
Document Separation	Split a scanned image. When multiple documents have been scanned, you can split up and save documents separately by using this function. You can also set the number of pages to split a document by.
Colour/Grey TIFF Compress	Select the compression TIFF file type for a colour/grey document.
B&W TIFF Compress	Select the compression TIFF file type for a monochrome document.
Advanced Settings	Continuous Scan Scan more pages than the maximum capacity of the ADF and save them as one data file. After scanning the first batch of documents, press Continue to scan additional pages. When finished scanning, press Complete .
	Colour Tone Adjustment Adjust the brightness and contrast.
	Adjust Auto Colour Detect When Colour Setting is set to Auto, you can adjust the detection level of colour.
	Skip Blank Page Sensitivity Select the sensitivity level for detecting blank pages in the scanned data. The higher the sensitivity, the easier it is for the machine to detect blank pages.
	Margin Settings Adjust your document's margins.
Set New Default	Save your settings as the default settings.
Factory Reset	Restore all settings back to the factory settings.

- To save the settings as a shortcut, press [Save as Shortcut].
- To select [Long Paper (Narrow)] or [Long Paper (Normal)] for [Document Size], use the following settings:
 - [2-sided Scan]: [Off]
 - [Colour Setting]: Other than [Auto] ([Colour], [Grey] or [Black and White])
 - [Resolution]: Lower than 300 dpi
 - [Skip Blank Page]: [Off]
- If signed PDF was selected from the [File Type] setting, you must configure the certificate settings using Web Based Management.

4. Press [Start].

The machine starts scanning, and then the scanned data is saved on the USB flash drive.

Send Scanned Data to an Email Recipient

Related Models: ADS-4700W/ADS-4900W

Send scanned data directly from your machine to an email recipient without using a computer. This function allows your machine to scan documents and send them to an email address without your machine being connected to a computer. To send the scanned data as an attachment directly to your default email application using the iPrint&Scan software on your computer, there is the "Scan to Email Attachment" function available instead.

- To send scanned data to an email recipient, you must configure your machine to communicate with your network and email server, which is used to send and receive emails.
- You can configure these items from the Web Based Management.
- To use the Scan to Email Server function, your machine will need to be connected to a network and have access to an SMTP server. You will need the following SMTP email settings before you can proceed:
 - Server address
 - Port number
 - User name
 - Encryption type (SSL or TLS)
 - Email server certificate (if used)

If you do not know these settings, contact your email service provider or network administrator.

1. Load your document.
2. Press [to Email Server].

- If you registered your email address with your user ID, the [to My E-mail] option appears when you log on to the machine using Secure Function Lock, Active Directory Authentication, or LDAP Authentication.
- To send scanned data to your email address, press [to My E-mail]. When your email address appears on the LCD, press [Next].
- To enable this feature in Web Based Management, go to the navigation menu, and then click **Scan > Scan to E-mail Server**. In the **Send to My E-mail** field, select **On**.

3. Do one of the following to enter the destination email address:
 - To enter the email address manually, press [Manual], and then enter the email address using the keyboard on the LCD. When finished, press [OK].
 - If the email address is stored in the machine's address book, press [Address Book], and then select the email address.
Press [OK].
4. Confirm the email address, and then press [Next].
5. To change the scan settings, press [Options]. Configure the following settings:

Option	Description
2-sided Scan	When using 2-sided scanning, select 2-sided Scan: Long Edge so the layout of the data file's pages matches your original.
Colour Setting	Select the colour format for your document.
Resolution	Select the scan resolution for your document.
File Type	Select the file format for your document.

Option	Description
Document Size	Select your document size.
File Name	Rename the file.
File Name Style	Select the order in which the date, counter number, and other items appear in the file names.
File Size	Select the file size for your document.
Skip Blank Page	When On is selected, blank pages are skipped.
Multifeed Detection	Detect a multifeed error.
Document Separation	Split a scanned image. When multiple documents have been scanned, you can split up and save documents separately by using this function. You can also set the number of pages to split a document by.
Colour/Grey TIFF Compress	Select the compression TIFF file type for a colour/grey document.
B&W TIFF Compress	Select the compression TIFF file type for a monochrome document.
Advanced Settings	Continuous Scan Scan more pages than the maximum capacity of the ADF and save them as one data file. After scanning the first batch of documents, press Continue to scan additional pages. When finished scanning, press Complete .
	Colour Tone Adjustment Adjust the brightness and contrast.
	Adjust Auto Colour Detect When Colour Setting is set to Auto, you can adjust the detection level of colour.
	Skip Blank Page Sensitivity Select the sensitivity level for detecting blank pages in the scanned data. The higher the sensitivity, the easier it is for the machine to detect blank pages.
	Margin Settings Adjust your document's margins.
Set New Default	Save your settings as the default settings.
Factory Reset	Restore all settings back to the factory settings.
Scan Preview	Preview a scan result on the LCD, before the scanned data is saved.

- To save the settings as a shortcut, press [Save as Shortcut].
- To preview the scanned results before the scanned data is saved, press  and then press [Preview]. The machine scans the document and displays the scanned results on the LCD. If the scanned results are fine, press [Start] to save it and to finish processing.
- The [Scan Preview] option is not available if:
 - Document size is set to Long paper
 - Colour is set to Black and White
 - File Type is set to TIFF

6. Press [Start].

The machine starts scanning.

Related Information

- [Scan Using the Scan Functions on Your Brother Machine](#)
 - [Use TX Verification Mail](#)
-

Use TX Verification Mail

Related Models: ADS-4700W/ADS-4900W

Use TX Verification Mail to request notification from the destination computer that your email was received and processed. Use Web Based Management to turn the verification feature on. When **Request Delivery Notification (Send)** is **On**, your email contains an additional field that is automatically populated with the email's arrival date and time.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **E-mail > E-mail Send**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. In the **Request Delivery Notification (Send)** field, click **On**.
6. Click **Submit**.

- Message Disposition Notification (MDN)

This field requests the status of the email message after delivery through the Simple Mail Transfer Protocol (SMTP) transport system. After the recipient has received the message, this data is used when the machine or user reads the received email. For example, if the message is opened and read, the receiver sends back a notification to the original sending machine or user.

The recipient must activate the MDN field to be able to send a notification report; otherwise the request will be ignored.

- This Brother machine cannot receive email messages. To use the TX Verification feature, you must redirect the return notification to a different email address. Configure the email address using Web Based Management. Access Web Based Management, go to the navigation menu, and then click **E-mail > E-mail**, click **SMTP** and confirm **Device E-mail Address**. Enter the email address that you want to receive the notification.

Set up a Scan to SFTP Profile

Set up a Scan to SFTP Profile to scan and upload scanned data directly to an SFTP location.

We recommend Microsoft Internet Explorer 11.0 or later/Microsoft Edge for Windows, Safari 12.0 or later for Mac, Google Chrome™ for Android (4.x or later), and Google Chrome™/Safari for iOS (10.x or later). Make sure that JavaScript and Cookies are always enabled in whichever browser you use.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Scan > Scan to FTP/SFTP/Network** or **Scan to FTP/SFTP/Network/SharePoint**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Select the **SFTP** option, and then click **Submit**.
6. Click the **Scan to FTP/SFTP/Network Profile** or **Scan to FTP/SFTP/Network/SharePoint Profile** menu.
7. Select the profile you want to set up or change.

Using the following characters: ?, /, \, ", :, <, >, | or * may cause a sending error.

Option	Description
Profile Name	Type a name for this server profile (up to 14 alphanumeric characters). The machine displays this name on the LCD.
Host Address	Type the Host Address (for example: ftp.example.com; up to 64 characters) or the IP address (for example: 192.23.56.189).
Username	Type a user name (up to 32 characters) that has permission to write data to the SFTP server.
Auth. Method	Select Password or Public Key . Do one of the following: • When you select Password, type the password (up to 33 characters) associated with the user name you typed in the Username field. Type the password again in the Retype password field. • When you select Public Key, select the authentication type from the Client Key Pair drop-down list.
Server Public Key	Select the authentication type.
Store Directory	Type the path (up to 255 characters) to the folder on the SFTP server where you want to send your scanned data. Do not type a slash mark at the beginning of the path (for example: brother/abc).
File Name	Select a file name from the preset names provided, or from user-defined names. You can set the user-defined names and file name style in the Scan File Name menu in the navigation menu.

Option	Description
Quality	Select a quality setting. When Auto is selected, you can adjust the detection level of colour from the Auto Color detect adjust drop-down list.
File Type	Select the file type you want to use for the scanned document.
Document Size	Select your document size from the list. This is necessary to make sure the scanned file is the correct size.
Margin Settings	Adjust your document's margins.
File Size	Select your file size.
Skip Blank Page	Select the On option to remove blank pages of the document from the scanning results.
Skip Blank Page Sensitivity	Select the sensitivity level for detecting blank pages in the scanned data. The higher the sensitivity, the easier it is for the machine to detect blank pages.
Multifeed Detection	Detect a multifeed error.
Document Separation	Split a scanned image. When multiple documents have been scanned, you can split up and save documents separately by using this function. You can also set the number of pages to split a document by.
Colour/Grey TIFF Compress	Select the compression TIFF file type for a colour/grey document.
B&W TIFF Compress	Select the compression TIFF file type for a monochrome document.
Scan Preview (ADS-4700W/ADS-4900W)	Preview the scanned results before the scanned data is saved.
2-sided Scan	Select On to scan both sides of the document.
Brightness	Select the brightness level.
Contrast	Select the contrast level.
Continuous Scan	Scan more pages than the maximum capacity of the ADF and save them as one data file.
Port Number	Change the Port Number setting used to access the SFTP server. The default for this setting is port 22. In most cases this setting does not need to be changed.

8. Click **Submit**.

Web Services for Scanning on Your Network (Windows 7, Windows 8.1 and Windows 10)

The Web Services protocol enables Windows 7, Windows 8.1 and Windows 10 users to scan using a Brother machine on the network. You must install the driver via Web Services.

- [Use Web Services to Install Drivers Used for Scanning \(Windows 7, Windows 8.1 and Windows 10\)](#)
- [Scan Using Web Services from the Brother Machine \(Windows 7, Windows 8.1 and Windows 10\)](#)
- [Configure Scan Settings for Web Services \(Windows\)](#)

Use Web Services to Install Drivers Used for Scanning (Windows 7, Windows 8.1 and Windows 10)

Use Web Services to monitor scanners on the network.

- Make sure you have installed the Brother software and drivers.
- Verify that the host computer and the Brother machine are on the same subnet, or that the router is correctly configured to pass data between the two devices.
- You must configure the IP address on your Brother machine before you configure this setting.

1. Do one of the following:

- Windows 10

Click  > **Windows System** > **Control Panel**. In the **Hardware and Sound** group, click **Add a device**.

- Windows 8.1

Move your mouse to the lower-right corner of your desktop. When the menu bar appears, click **Settings** > **Change PC settings** > **PC and devices** > **Devices** > **Add a device**.

The machine's Web Services Name appears.

- Windows 7

Click  (**Start**) > **Control Panel** > **Network and Internet** > **View network computers and devices**.

The machine's Web Services Name appears with the scanner icon.

Right-click the machine you want to install.

The Web Services Name for the Brother machine is your model name and the MAC Address (Ethernet Address) of your machine (for example, Brother XXX-XXXXX (model name) [XXXXXXXXXXXX] (MAC Address / Ethernet Address)).

2. Do one of the following:

- Windows 8.1/Windows 10

Select the machine you want to install, and then follow the on-screen instructions.

- Windows 7

Click **Install** in the displayed menu.

To uninstall drivers, click **Uninstall** or  (**Remove device**).

Scan from Your Computer (Windows)

There are several ways you can use your computer to scan documents on your Brother machine. Use the software applications provided by Brother, or use your favourite scanning application.

- [Scan Using Nuance™ PaperPort™ 14SE or Other Windows Applications](#)
- [Scan Using Windows Fax and Scan](#)
- [Scan Using Brother iPrint&Scan \(Windows\)](#)

Scan Using Nuance™ PaperPort™ 14SE or Other Windows Applications

You can use the Nuance™ PaperPort™ 14SE application for scanning.

- To download the Nuance™ PaperPort™ 14SE application, click  (Brother Utilities), select **Do More** in the left navigation bar, and then click **PaperPort**.
- For detailed instructions on using each application, click the application's **Help** menu, and then click **Getting Started Guide** in the **Help** ribbon.

The instructions for scanning in these steps are for Nuance™ PaperPort™ 14SE. For other Windows applications, the steps will be similar. Nuance™ PaperPort™ 14SE supports both TWAIN and WIA drivers; the TWAIN driver (recommended) is used in these steps.

1. Load your document.
2. Start Nuance™ PaperPort™ 14. Do one of the following:
 - Windows 10
Click  > **Nuance PaperPort 14** > **PaperPort**.
 - Windows 8.1
Click  (**PaperPort**).
 - Windows 7
Click  (**Start**) > **All Programs** > **Nuance PaperPort 14** > **PaperPort**.
3. Click the **Desktop** menu, and then click **Scan Settings** in the **Desktop** ribbon.
The **Scan or Get Photo** panel appears on the left side of the screen.
4. Click **Select**.
5. From the available Scanners list, select **TWAIN: TW-Brother ADS-XXXXX** or **TWAIN: TW-Brother ADS-XXXXX LAN** (where XXXXX is the model name of your machine). To use the WIA driver, select the Brother driver that has "WIA" as the prefix.
6. Click **OK**.
7. Select the **Display scanner dialog box** checkbox in the **Scan or Get Photo** panel.
8. Click **Scan**.
The Scanner Setup dialog box appears.

9. Adjust the settings in the Scanner Setup dialog box, if needed.
10. Click the **Document Size** drop-down list, and then select your document size.
11. Click **PreScan** to preview your image and crop unwanted portions before scanning.
12. Click **Start**.

The machine starts scanning.

Related Information

- [Scan from Your Computer \(Windows\)](#)
- [TWAIN Driver Settings \(Windows\)](#)

TWAIN Driver Settings (Windows)

- Note that the item names and assignable values will vary depending on the machine.
- Load only one document per scanning sequence when **Long Paper** or **Carrier Sheet Mode** is selected.

1. Scan

Select the **Photo** or **Document** option depending on the type of document you want to scan.

Scan (Image Type)		Resolution	Colour Setting
Document	Use for scanning text documents.	300 x 300 dpi	24bit Colour
Photo	Use for scanning photo images.	300 x 300 dpi	24bit Colour

2. Resolution

Select a scanning resolution from the **Resolution** drop-down list. Higher resolutions produce a finer scanned image but consume more memory and increase transfer time.

Long Paper is available for scanning at resolutions below 300 x 300 dpi.

3. Color Setting

Select from a range of scan colour depths.

- **Auto**

Automatically detects whether the document uses colour and generates a scanned image of it. For documents that mix colour and monochrome pages, colour pages will be scanned in Colour mode, while monochrome pages will be scanned in **Black & White** mode.

- **Black & White**

Use for text or line art images.

- **Grey (Error Diffusion)**

Use for photographic images or graphics. (Error Diffusion is a method for creating simulated greyscale images without using true grey dots. Black dots are put in a specific pattern to give a grey appearance.)

- **True Grey**

Use for photographic images or graphics. This mode is more accurate because it uses up to 256 shades of grey.

- **24bit Colour**

Use to create an image with the most accurate colour reproduction. This mode uses up to 16.8 million colours to scan the image, but it requires the most memory and has the longest transfer time.

4. Document Size

Select the exact size of your document from a selection of preset scan sizes. If you select **Custom**, the **Custom Document Size** dialog box appears and you can specify the document size.

5. 2-sided Scanning

Scan both sides of the document. Select **Long-edge binding** or **Short-edge binding** depending on the layout of your original to make sure the data file created appears correctly in the scanned document.

2-sided Scanning is not available for **Long Paper**.

2-sided Scan Setting	Original Layout	Scan Result
Long-edge binding		
Short-edge binding		

6. Advanced Settings

Configure advanced settings by clicking the **Advanced Settings** link in the Scanner Setup dialog box.

- **Document Correction**

- **Cropping**

- **Auto Deskew**

Set the machine to correct document skewing automatically.

Auto Deskew feature is automatically set to On if you select **Auto** for the **Document Size**.

- **Detect End of Page (ADF)**

Detects the end of page and automatically adjusts the size of a page when the length of the document is shorter than the **Document Size** selected.

- **Margin Settings**

This feature allows you to add or remove a specific margin (from -3 mm to 3 mm) at the edge of the image. A positive value increases the size of the scanned image when it is output and a negative value decreases the size of the scanned image when it is output.

Margin Settings is available only when **Document Size** is set to **Auto**.

- **Rotate Image**

Changes the direction of the document based on the text orientation.

- **Fill With Color**

- **Tear Fill**

Detects and fills tear marks on the scanned image using the selected colour and range.

- **Edge Fill**

Fill in the edges on four sides of the scanned image using the selected colour and range.

- **Punch Hole Removal**

This feature removes the punch hole markings by filling hole marks with white or the surrounding colour.

- **Auto Colour Detect Adjust**

When colour setting **Auto** is selected, you can adjust the detection level of colour. Increasing the slider value makes the machine more likely to determine that a given document is a colour document.

- **Skip Blank Page**

Remove the document's blank pages from the scanning results.

- **Enhancement**

- **Diffusion Adjustment -Grey**

This function adjusts the brightness and contrast to create grey images.

Only effective when the **Color Setting** is **Grey (Error Diffusion)**.

Brightness

Set the **Brightness** level by moving the slider to the right or left to lighten or darken the image. If the scanned image is too light, set a lower brightness level and scan the document again. If the image is too dark, set a higher brightness level and scan the document again. You can also type a value in the field to set the brightness.

Contrast

Increase or decrease the **Contrast** level by moving the slider to the right or left. An increase emphasises dark and light areas of the image, while a decrease reveals more details in grey areas. You can also type a value in the field to set the contrast.

- **Colour Tone Adjustment**

Allows you to adjust the brightness, contrast, shadow, highlight, and gamma during True grey and colour scanning.

- **Background Processing**

- **Remove Bleed-through / Pattern**

Prevent bleed-through.

- **Remove Background Colour**

Remove the base colour of documents to make the scanned data more legible.

- **Colour Drop**

Select a colour to remove from the scanned image.

- **Edge Emphasis**

Make the characters of the original sharper.

- **Moire Reduction**

Reduce the moiré pattern, or cross-hatching, in a scanned image.

- **Vertical Streak Reduction**

Reduce the vertical streaks in a scanned image.

The following items can be selected when scanning colour or grey images:

- **Colour Tone Adjustment**

- **Edge Emphasis**

- **B&W Image Quality**

- **B&W Threshold Adjustment**

This setting allows you to adjust the image quality when scanning in **Black & White** mode. Larger values increase the amount of black in the scanned image, while smaller values increase the amount of white.

- **Character Correction**

Correct any broken or incomplete characters in the original to make them easier to read.

Character Correction can be selected when scanning monochrome images.

- **B&W Inversion**

This feature allows you to create a monochrome inverted version of the scanned image.

- **Noise Reduction**

You can improve and enhance the quality of your scanned images with this selection. The **Noise Reduction** setting is available when a document size other than **Long Paper** is selected in **Black & White** mode.

- **Remove Ruled Line**

This feature allows you to remove lines in the document. You can select the type of line direction to remove (**Vertical**, **Horizontal**, **Vertical and Horizontal**).

- **Minimum Line Length**

Lines longer than or equal to the specified length are removed.

- **Maximum Clearance**

If lines are broken, for example due to fading of the image, the lines that are broken for an interval less than or equal to the specified broken line distance will be detected and removed.

Original Document	Scan Result	Description
There are horizontal and vertical lines. 		If you select Vertical , the vertical line is removed.
		If you select Horizontal , the horizontal line is removed.
		If you select Vertical and Horizontal , all lines are removed.

- **Feed Control**

- **Layout**

Allows you to scan a two-page document combined into one page, or scan a one-page document divided into two pages.

Choose one of the following options:

Option	Description
2in1: Long Edge	Combine a two-page document into a single page using landscape orientation. 
2in1: Short Edge	Combine a two-page document into a single page using portrait orientation. 
1 to 2: Long Edge	Divide a one-page document into two pages using portrait orientation. 
1 to 2: Short Edge	Divide a one-page document into two pages using landscape orientation. 

- **Carrier Sheet Mode**

Use the optional Carrier Sheet to scan the following document types:

- Important documents (photos, contracts)
- Thin paper (receipts)
- Irregularly-shaped paper (clippings)

- **Single Page Scan**

Scans one page at a time from the ADF, regardless of the number of pages in the ADF.

- **Continuous Scan**

Select this option to scan additional documents using the same settings when a scan has been completed. It is useful when you are scanning more documents than the ADF can hold or when you are scanning several documents at once.

(ADS-4300N) **Auto** is available only when using the USB connection.

- **Multifeed Detection**

When your machine detects a multifeed, you must confirm that the data scanned so far has been saved, and then start scanning again at the next page or the beginning of the document.

- Disable this setting when scanning thick paper. Otherwise the machine may accidentally detect a multifeed.
- If you enable **Carrier Sheet Mode**, you cannot enable **Multifeed Detection**.

- **Additional Functions**

- **Barcode Detection**

- The machine reads the barcode printed on the scanned image. Specify the barcode type and detection area.

- **Barcode Detection** is available when **Layout** is Off.
- To scan and read barcodes, use a third-party application. The TWAIN driver alone cannot convert barcodes into data.

- **JPEG Compression**

- Changes the quality of the JPEG file to be saved.

This function is available only when using a third-party application with Disk File mode.

- **Digital Imprinter**

- Add the date, time, document count, or other custom text on your scanned image.

- **Other**

- Optimize Data Transfer**

- Adjust the Data Transfer Rate.

Before Configuring Your Brother Machine for a Wireless Network

Related Models: ADS-4700W/ADS-4900W

Before attempting to configure a wireless network, confirm the following:

- Before configuring wireless settings, you must know your Network Name (SSID) and Network Key (Password).

If you do not know this security information, contact the router manufacturer, your system administrator, or your Internet provider.

- To achieve optimum results with normal everyday document scanning, place the Brother machine as close to the wireless access point/router as possible with minimal obstructions. Large objects and walls between the two devices and interference from other electronic devices can affect the data transfer speed of your documents.

Due to these factors, wireless may not be the best method of connection for all types of documents and applications. If you are scanning large files, such as multi-page documents with mixed text and large graphics, you may want to consider selecting wired Ethernet for faster data transfer, or USB for the fastest throughput speed.

- Although the Brother machine can be used in both a wired and wireless network, only one connection method can be used at a time.
- If there is a signal in the vicinity, wireless LAN allows you to freely make a LAN connection. However, if security settings are not correctly configured, the signal may be intercepted by malicious third-parties, possibly resulting in:
 - Theft of personal or confidential information
 - Improper transmission of information to parties impersonating the specified individuals
 - Dissemination of transcribed communication contents that were intercepted

Configure Your Machine for a Wireless Network Using the Machine's Control Panel Setup Wizard

Related Models: ADS-4700W/ADS-4900W

Before configuring your machine, we recommend writing down your wireless network settings. You will need this information before you continue with the configuration.

1. Check and write down the current wireless network settings.

Network Name (SSID)

Network Key (Password)

For example:

Network Name (SSID)
HELLO

Network Key (Password)
12345

If your router uses WEP encryption, enter the Network Key (Password) used as the first WEP key. Your Brother machine supports the use of the first WEP key only.

2. Press  [Settings] > [Network] > [WLAN (Wi-Fi)] > [Find Wi-Fi Network].
3. When [Enable WLAN? Do you want to continue?] appears, press [Yes].
The wireless setup wizard starts. To cancel, press [No].
4. The machine searches for your network and displays a list of available SSIDs. Press ▲ or ▼ to display the SSID you want to connect to, and then press it.
5. Press [OK].
6. Do one of the following:
 - If using an authentication and encryption method that requires a Network Key (Password), enter the Network Key (Password) you wrote down in the first step.
When you have entered all the characters, press [OK].
 - If your authentication method is Open System and your encryption mode is None, go to the next step.
7. The machine attempts to connect to the wireless device you have selected.

If your wireless device is connected successfully, the LCD displays [Connected].

You have completed the wireless network setup. To install drivers and software necessary for operating your machine, go to your model's **Downloads** page at support.brother.com.

Related Information

Configure Your Machine for a Wireless Network Using the One-Push Method of Wi-Fi Protected Setup™ (WPS)

Related Models: ADS-4700W/ADS-4900W

If your wireless access point/router supports Wi-Fi Protected Setup™ (WPS), you can use WPS from your machine's control panel menu to configure your wireless network settings.

1. Press  [Settings] > [Network] > [WLAN (Wi-Fi)] > [WPS/Push Button].
2. When [Enable WLAN? Do you want to continue?] appears, press [Yes].
The wireless setup wizard starts. To cancel, press [No].
3. When the touchscreen instructs you to start WPS, press the WPS button on your wireless access point/router. Press [OK], and then your machine automatically tries to connect to your wireless network.

If your wireless device is connected successfully, the LCD displays [Connected].

You have completed the wireless network setup. To install drivers and software necessary for operating your machine, go to your model's **Downloads** page at support.brother.com.

Related Information

- [Use the Wireless Network](#)

Configure Your Machine for a Wireless Network Using the PIN Method of Wi-Fi Protected Setup™ (WPS)

Related Models: ADS-4700W/ADS-4900W

If your wireless access point/router supports WPS, you can use the Personal Identification Number (PIN) Method to configure your wireless network settings.

The PIN Method is one of the connection methods developed by the Wi-Fi Alliance®. By submitting a PIN created by an Enrollee (your machine) to the Registrar (a device that manages the wireless LAN), you can set up the wireless network and security settings. For more information on how to access WPS mode, see the instructions provided with your wireless access point/router.

Type A

Connection when the wireless access point/router (1) doubles as the Registrar.

Type B

Connection when another device (2), such as a computer, is used as the Registrar.

1. Press  [Settings] > [Network] > [WLAN(Wi-Fi)] > [WPS/PIN Code].
2. When [Enable WLAN? Do you want to continue?] appears, press [Yes].
The wireless setup wizard starts. To cancel, press [No].
3. The LCD displays an eight-digit PIN and the machine starts searching for a wireless access point/router.
4. Using a computer connected to the network, in your browser's address bar, type the IP address of the device you are using as the Registrar. (For example: <http://192.168.1.2>)
5. Go to the WPS settings page and type the PIN, and then follow the on-screen instructions.

- The Registrar is usually the wireless access point/router.
- The settings page will differ depending on the brand of wireless access point/router. For more detailed information, see the instructions supplied with your wireless access point/router.

If using a Windows 7, Windows 8.1, or Windows 10 computer as a Registrar, complete the following steps:

6. Do one of the following:

-
- Windows 10

Click  > **Windows System** > **Control Panel**. In the **Hardware and Sound** group, click **Add a device**.

- Windows 8.1

Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Settings** > **Control Panel** > **Hardware and Sound** > **Devices and Printers** > **Add a device**.

- Windows 7

Click  (**Start**) > **Devices and Printers** > **Add a device**.

- To use Windows 7, Windows 8.1, or Windows 10 computer as a Registrar, you must register it to your network in advance. For more detailed information, see the instructions supplied with your wireless access point/router.
 - If you use Windows 7, Windows 8.1, or Windows 10 as a Registrar, you can install the scanner driver after the wireless configuration by following the on-screen instructions. To install the full driver and software package, see the *Quick Setup Guide*.
-

7. Select your machine and click **Next**.

8. Type the PIN displayed on the machine's LCD, and then click **Next**.

9. (Windows 7 only) Select your network, and then click **Next**.

10. Click **Close**.

If your wireless device is connected successfully, the LCD displays [Connected].

You have completed the wireless network setup. To install drivers and software necessary for operating your machine, go to your model's **Downloads** page at support.brother.com.

Wireless LAN Error Codes

Related Models: ADS-4700W/ADS-4900W

If the LCD displays an error message, locate the message in the table and use the recommended solution to correct the error.

Error Code	Problem and Recommended Solutions
TS-01	The WLAN (Wi-Fi) is not enabled. Check the following points and try to set up your wireless connection again: • Enable the WLAN setting on your machine. • If a network cable is connected to your machine, disconnect it.
TS-02	The wireless router/access point cannot be detected. Check the following points and try to set up your wireless connection again: • Make sure the wireless router/access point is on. • Temporarily place your machine closer to the wireless router/access point when you are configuring the wireless settings. • If your wireless router/access point is using MAC address filtering, confirm that the MAC address of the machine is allowed in the filter. • If you manually entered the Network Name (SSID) and security information (authentication method/encryption method), the information may be incorrect. Check the Network Name and security information again and re-enter the correct information. • Restart your wireless router/access point. If you cannot find the Network Name (SSID) and security information, see the documentation provided with your wireless router/access point, or contact the router manufacturer, your system administrator, or Internet service provider.
TS-03	The wireless enterprise network and security settings you entered may be incorrect. Check the following points and try to set up your wireless connection again: Verify the following information: - Network Name (SSID) you selected to configure your machine. - Security information you selected to configure your machine (such as the authentication method, encryption method, or User ID). If you still cannot find the Network Name (SSID) and security information, see the documentation provided with your wireless router/access point, or contact the router manufacturer, your system administrator, or Internet service provider.
TS-04	Your machine does not support the authentication and encryption methods used by the selected wireless router/access point. For infrastructure mode (Most common) Change the authentication and encryption methods of the wireless router/access point. Your machine supports the following authentication and encryption methods: • WPA-Personal: TKIP / AES • WPA2-Personal: TKIP / AES • WPA3-Personal: AES • Open: WEP / NONE (without encryption) • Shared key: WEP If your issue is not solved, the Network Name (SSID) or security settings you entered may be incorrect. Check that all wireless network settings are correct for your network.

Error Code	Problem and Recommended Solutions
TS-05	The Network Name (SSID) and Network Key (Password) are incorrect. Check the following points and try to set up your wireless connection again: • Confirm the Network Name (SSID) and Network Key (Password). • If your Network Key contains upper-case and lower-case letters, make sure you type them correctly. • If you cannot find the Network Name (SSID) and security information, see the documentation provided with your wireless router/access point, or contact the router manufacturer, your system administrator, or Internet service provider. • If your wireless router/access point uses WEP encryption with multiple WEP keys, write down and use only the first WEP key.
TS-06	The wireless security information (authentication method/encryption method/Network Key (Password)) is incorrect. Check the following points and try to set up your wireless connection again: • Confirm the Network Key. If your Network Key contains upper-case and lower-case letters, make sure you type them correctly. • Confirm whether the authentication method entered and the authentication method or encryption method supported by the wireless router/access point are the same. • If the network key, authentication method, and encryption method have been confirmed, restart your wireless router/access point and the machine. • If your wireless router/access point's Stealth Mode is on, you may need to disable it to connect to the wireless network. If you cannot find the Network Name (SSID) and security information, see the documentation provided with your wireless router/access point, or contact the router manufacturer, your system administrator, or Internet service provider.
TS-07	The machine cannot detect a wireless router/access point that has WPS (Wi-Fi Protected Setup) enabled. Check the following points and try again: • To check if your wireless router/access point supports WPS, look for the WPS symbol displayed on the router/access point. For more information, see the documentation provided with your wireless router/access point. • To set up your wireless connection using WPS, you must configure both your machine and the wireless router/access point. For more information, see the user's guide. • If you do not know how to set up your wireless router/access point using WPS, see the documentation provided with your wireless router/access point, or contact the router manufacturer, your system administrator, or Internet service provider.
TS-08	Two or more wireless routers or access points that have WPS enabled are detected. Check the following points and try again: • Make sure that only one wireless router/access point within range has WPS enabled, and then try to connect again. • Try to connect again after a few minutes to avoid interference from other access points/routers.

How to confirm wireless security information (SSID/authentication method/encryption method/Network Key) of your WLAN access point/router:

1. The default security settings may be provided on a label attached to the WLAN access point/router. Or the manufacturer's name or model number of the WLAN access point/router may be used as the default security settings.
2. See the documentation provided with your WLAN access point/router for information on how to find the security settings.
 - If the WLAN access point/router is set to not broadcast the SSID, the SSID will not automatically be detected. You will have to manually enter the SSID name.
 - The Network key may also be described as the Password, Security Key, or Encryption Key.

If you do not know the SSID and wireless security settings of your WLAN access point/router or how to change the configuration, see the documentation provided with your WLAN access point/router, ask the manufacturer of your access point/router or ask your Internet provider or network administrator.

 - [Perform an LDAP Search Using Your Machine's Control Panel](#)

Change LDAP Configuration Using Web Based Management

Related Models: ADS-4700W/ADS-4900W

Use Web Based Management to configure your LDAP settings in a web browser.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Network > Protocol**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Select the **LDAP** checkbox, and then click **Submit**.
6. Restart your Brother machine to activate the configuration.
7. On your computer, in Web Based Management, go to the navigation menu, and then click **Address Book > LDAP**.

- **LDAP Search**
- **LDAP Server Address**
- **SSL/TLS**
- **Port** (The default port number is 389.)
- **Search Root**
- **Authentication**
- **Username**

This selection will be available depending on the authentication method used.

- **Password**

This selection will be available depending on the authentication method used.

- If the LDAP server supports Kerberos authentication, we recommend selecting Kerberos for the Authentication settings. It provides strong authentication between the LDAP server and your machine.
- You must configure the SNTP protocol (network time server), or you must set the date, time and time zone correctly on the control panel for Kerberos authentication.

- **Kerberos Server Address**

This selection will be available depending on the authentication method used.

- **Timeout for LDAP**
- **Attribute of Name (Search Key)**
- **Attribute of E-mail**
- **Optional Attribute**

8. When finished, click **Submit**. Make sure the **Status** field reads **On**.

Perform an LDAP Search Using Your Machine's Control Panel

Related Models: ADS-4700W/ADS-4900W

After you configure LDAP settings, you can use the LDAP search feature to find email addresses to use for scanning to Email Server.

- The LDAP feature supports LDAPv3.
- You may need to use Kerberos Authentication or Simple Authentication to connect to your LDAP server, depending on the security policy set by your network administrator.
- You must configure the SNTP protocol (network time server), or you must set the date, time and time zone correctly on the control panel for Kerberos authentication.

1. Press  to search.
2. Enter the initial characters for your search using the LCD.
3. Press [OK].

The LDAP search result will be shown on the LCD; the  icon appears before the email (local) address book search results.

If there is no match on the server or the email (local) address book, the LCD displays [Results cannot be found.] for about 60 seconds.

4. Press ▲ or ▼ to display the name you want.
5. Press the name.
To view the details of the name, press [Details].
6. If the result includes more than one email address, the machine will prompt you to select just one. Press [Apply].
7. Load your document, press [Next], and then press [Start].

- [Change LDAP Configuration Using Web Based Management](#)
- [Perform an LDAP Search Using Your Machine's Control Panel](#)

Configure Date and Time Using Web Based Management

Configure the date and time to synchronise the time used by the machine with the SNTP time server.

This feature is not available in some countries.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Administrator > Date&Time**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Select the time difference between your location and UTC from the **Time Zone** drop-down list.
For example, the time zone for Eastern Time in the USA and Canada is UTC-05:00.
6. Select the **Synchronize with SNTP server** checkbox.
7. Click **Submit**.

You can also configure date and time manually.

Related Information

Configure the SNTP Protocol Using Web Based Management

Configure the SNTP protocol to synchronise the time the machine uses for authentication with the time kept by the SNTP time server.

This feature is not available in some countries.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Network > Protocol**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Select the **SNTP** checkbox to activate the settings.
6. Click **Submit**.
7. Click **Yes** to restart your Brother machine.
8. Next to the SNTP checkbox, click **Advanced Settings** and configure your settings as needed.

Option	Description
Status	Displays whether the SNTP protocol is enabled or disabled.
Synchronization Status	Confirm the latest synchronisation status.
SNTP Server Method	Select AUTO or STATIC . • AUTO If you have a DHCP server in your network, the SNTP server will obtain the address from that server automatically. • STATIC Type the address you want to use.
Primary SNTP Server Address Secondary SNTP Server Address	Type the server address (up to 64 characters). The secondary SNTP server address is used as a backup to the primary SNTP server address. If the primary server is unavailable, the machine will contact the secondary SNTP server.
Primary SNTP Server Port Secondary SNTP Server Port	Type the port number (1-65535). The secondary SNTP server port is used as a backup to the primary SNTP server port. If the primary port is unavailable, the machine will contact the secondary SNTP port.
Synchronization Interval	Type the number of hours between server synchronisation attempts (1-168 hours).

9. Click **Submit**.

Before Using Network Security Features

Your machine employs some of the latest network security and encryption protocols available today. These network features can be integrated into your overall network security plan to help protect your data and prevent unauthorised access to the machine.

We recommend disabling the FTP protocol. Accessing the machine using this protocol is not secure. However, note that if you disable FTP, the Scan to FTP feature will be disabled.

Related Information

- [Security](#)

Configure Certificates for Device Security

You must configure a certificate to manage your networked machine securely using SSL/TLS. You must use Web Based Management to configure a certificate.

- [Supported Security Certificate Features](#)
- [Step by Step Guide for Creating and Installing a Certificate](#)
- [Create a Self-signed Certificate](#)
- [Create CSR and Install a Certificate from a Certificate Authority \(CA\)](#)
- [Import and Export the Certificate and Private Key](#)
- [Import and Export a CA Certificate](#)
- [Manage Multiple Certificates](#)

Supported Security Certificate Features

Your machine supports the use of multiple security certificates, which allows secure authentication and communication with the machine. The following security certificate features can be used with the machine:

- SSL/TLS communication
- IEEE 802.1x authentication

The Brother machine supports the following:

- Pre-installed certificate

Your machine has a pre-installed self-signed certificate. This certificate enables you to use SSL/TLS communication without creating or installing a different certificate.

The pre-installed self-signed certificate protects your communication up to a certain level. We recommend using a certificate that is issued by a trusted organisation for better security.

- Self-signed certificate

This scan server issues its own certificate. Using this certificate, you can easily use the SSL/TLS communication without creating or installing a different certificate from a CA.

- Certificate from a Certificate Authority (CA)

There are two methods for installing a certificate from a CA. If you already have a certificate from a CA or if you want to use a certificate from an external trusted CA:

- When using a Certificate Signing Request (CSR) from this scan server.
- When importing a certificate and a private key.

- Certificate Authority (CA) Certificate

To use a CA certificate that identifies the CA and owns its private key, you must import that CA certificate from the CA before configuring the security features of the Network.

- If you are going to use SSL/TLS communication, we recommend contacting your system administrator first.
- When you reset the scan server back to its default factory settings, the certificate and the private key that are installed will be deleted. If you want to keep the same certificate and the private key after resetting the scan server, export them before resetting, and then reinstall them.

Related Information

- [Configure Certificates for Device Security](#)

Related Topics:

- [Configure IEEE 802.1x Authentication for a Wired or a Wireless Network Using Web Based Management \(Web Browser\)](#)

Step by Step Guide for Creating and Installing a Certificate

There are two options when choosing a security certificate: use a self-signed certificate or use a certificate from a Certificate Authority (CA).

Option 1

Self-Signed Certificate

1. Create a self-signed certificate using Web Based Management.
2. Install the self-signed certificate on your computer.

Option 2

Certificate from a CA

1. Create a Certificate Signing Request (CSR) using Web Based Management.
2. Install the certificate issued by the CA on your Brother machine using Web Based Management.
3. Install the certificate on your computer.

Related Information

- [Configure Certificates for Device Security](#)

Create a Self-signed Certificate

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Security > Certificate**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Click **Create Self-Signed Certificate**.
6. Enter a **Common Name** and a **Valid Date**.
 - The length of the **Common Name** is less than 64 bytes. Enter an identifier, such as an IP address, node name, or domain name to use when accessing this machine through SSL/TLS communication. The node name is displayed by default.
 - A warning will appear if you use the IPPS or HTTPS protocol and enter a different name in the URL than the **Common Name** that was used for the self-signed certificate.
7. Select your setting from the **Public Key Algorithm** drop-down list. The default setting is **RSA(2048bit)**.
8. Select your setting from the **Digest Algorithm** drop-down list. The default setting is **SHA256**.
9. Click **Submit**.

Related Information

- [Configure Certificates for Device Security](#)

Related Topics:

- [Access Web Based Management](#)

Create CSR and Install a Certificate from a Certificate Authority (CA)

If you already have a certificate from an external trusted CA, you can store the certificate and private key on the machine and manage them by importing and exporting. If you do not have a certificate from an external trusted CA, create a Certificate Signing Request (CSR), send it to a CA for authentication, and install the returned certificate on your machine.

- [Create a Certificate Signing Request \(CSR\)](#)
- [Install a Certificate on Your Machine](#)

Create a Certificate Signing Request (CSR)

A Certificate Signing Request (CSR) is a request sent to a Certificate Authority (CA) to authenticate the credentials contained within the certificate.

We recommend installing a Root Certificate from the CA on your computer before creating the CSR.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Security > Certificate**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Click **Create CSR**.
6. Type a **Common Name** (required) and add other information about your **Organization** (optional).

- Your company details are required so that a CA can confirm your identity and verify it to the outside world.
- The length of the **Common Name** must be less than 64 bytes. Enter an identifier, such as an IP address, node name, or domain name to use when accessing this machine through SSL/TLS communication. The node name is displayed by default. The **Common Name** is required.
- A warning will appear if you type a different name in the URL than the Common Name that was used for the certificate.
- The length of the **Organization**, the **Organization Unit**, the **City/Locality** and the **State/Province** must be less than 64 bytes.
- The **Country/Region** should be a two-character ISO 3166 country code.
- If you are configuring an X.509v3 certificate extension, select the **Configure extended partition** checkbox, and then select **Auto (Register IPv4)** or **Manual**.

7. Select your setting from the **Public Key Algorithm** drop-down list. The default setting is **RSA(2048bit)**.
8. Select your setting from the **Digest Algorithm** drop-down list. The default setting is **SHA256**.
9. Click **Submit**.

The CSR appears on your screen. Save the CSR as a file or copy and paste it into an online CSR form offered by a Certificate Authority.

10. Click **Save**.

- Follow your CA's policy regarding the method to send a CSR to your CA.
- If you are using the Enterprise root CA of Windows Server 2008/2008 R2/2012/2012 R2/2016/2019, we recommend using the Web Server for the certificate template to securely create the Client Certificate. If you are creating a Client Certificate for an IEEE 802.1x environment with EAP-TLS authentication, we recommend using User for the certificate template.

Install a Certificate on Your Machine

When you receive a certificate from a CA, follow the steps below to install it into the scan server:

Only a certificate issued with your machine's CSR can be installed onto the machine. When you want to create another CSR, make sure that the certificate is installed before creating another CSR. Create another CSR only after installing the certificate on the machine. Otherwise, the CSR you create before installing will be invalid.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Security > Certificate**.

Start from ☰, if the navigation menu is not shown on the left side of the screen.

5. Click **Install Certificate**.
6. Browse to the file that contains the certificate issued by the CA, and then click **Submit**.

The certificate has been created and saved in your machine's memory successfully.

To use SSL/TLS communication, the Root Certificate from the CA must be installed on your computer. Contact your network administrator.

Export a CA Certificate

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Security > CA Certificate**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Select the certificate you want to export and click **Export**.
6. Click **Submit**.
7. Click ▼ next to **Save**, and then specify the location where you want to save the file.

Manage Multiple Certificates

The multiple certificate feature allows you to use Web Based Management to manage each certificate installed on your machine. In Web Based Management, navigate to the **Certificate** or **CA Certificate** screen to view certificate content, delete, or export your certificates.

	Maximum Number of Certificates Stored on Brother Machine
Self-signed Certificate or Certificate Issued by a CA	5
CA Certificate	7

We recommend storing fewer certificates than allowed, reserving an empty spot in case of certificate expiration. When a certificate expires, import a new certificate into the reserved spot, and then delete the expired certificate. This ensures that you avoid configuration failure.

- When you use HTTPS/IPPS or IEEE 802.1x, you must select which certificate you are using.
- When you use SSL for SMTP communications, you do not have to choose the certificate. The necessary certificate will be chosen automatically.

Introduction to SSL/TLS

Secure Socket Layer (SSL) or Transport Layer Security (TLS) is an effective method of protecting data sent over a local or wide area network (LAN or WAN). It works by encrypting data, such as a scan job, sent over a network, so anyone trying to capture it will not be able to read it.

SSL/TLS can be configured on both wired and wireless networks and will work with other forms of security such as WPA keys and firewalls.

Related Information

- [Use SSL/TLS](#)
 - [Brief History of SSL/TLS](#)
 - [Benefits of Using SSL/TLS](#)
-

Brief History of SSL/TLS

SSL/TLS was originally created to secure web traffic information, particularly data sent between web browsers and servers. For example, when you use Internet Explorer for Internet Banking and you see https:// and the little padlock icon in the web browser, you are using SSL. SSL grew to work with additional applications, such as Telnet, printer, and FTP software, in order to become a universal solution for online security. Its original design intentions are still being used today by many online retailers and banks to secure sensitive data, such as credit card numbers, customer records, etc.

SSL/TLS uses extremely high levels of encryption and is trusted by banks all over the world.

Related Information

- [Introduction to SSL/TLS](#)

Benefits of Using SSL/TLS

The primary benefit of using SSL/TLS is to guarantee secure scanning over an IP network by restricting unauthorised users from reading data sent to the machine. SSL's key selling point is that it can be used to scan confidential data securely. For example, an HR department in a large company may be scanning wage slips on a regular basis. Without encryption, the data contained on these wages slips can be read by other network users. However, with SSL/TLS, anyone trying to capture the data will see a confusing page of code and not the actual wage slip.

- [Configure Certificates for Device Security](#)

Configure a Certificate for SSL/TLS and Available Protocols

Configure a certificate on your machine using Web Based Management before you use SSL/TLS communication.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Network > Protocol**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Click **HTTP Server Settings**.
6. Select the certificate you want to configure from the **Select the Certificate** drop-down list.
7. Click **Submit**.
8. Click **Yes** to restart your scan server.

Install the Self-signed Certificate for Windows users with Administrator Rights

The following steps are for Microsoft Internet Explorer. If you use another web browser, consult the documentation for your web browser to get help with installing certificates.

1. Do one of the following:
 - Windows 10, Windows Server 2016, and Windows Server 2019
Click  > **Windows Accessories**.
 - Windows 8.1
Right-click the  (**Internet Explorer**) icon on the taskbar.
 - Windows Server 2012 and Windows Server 2012 R2
Click  (**Internet Explorer**), and then right-click the  (**Internet Explorer**) icon that appears on the taskbar.
 - Windows 7 and Windows Server 2008
Click  (**Start**) > **All Programs**.
2. Right-click **Internet Explorer**, and then click **Run as administrator**.
 If the **More** option appears, click **More**.
If the **User Account Control** screen appears, click **Yes**.
3. Type "https://machine's IP address" in your browser's address bar to access your machine (where "machine's IP address" is the machine's IP address or the node name that you assigned for the certificate).
4. Click **More information**.
5. Click **Go on to the webpage (not recommended)**.

- Click **Certificate error**, and then click **View certificates**.

- Click **Install Certificate....**
- When the **Certificate Import Wizard** appears, click **Next**.
- Select **Place all certificates in the following store**, and then click **Browse....**
- Select **Trusted Root Certification Authorities**, and then click **OK**.
- Click **Next**.
- Click **Finish**.
- Click **Yes**, if the fingerprint (thumbprint) is correct.
- Click **OK**.

Use SNMPv3

- [Manage Your Network Machine Securely Using SNMPv3](#)

Manage Your Network Machine Securely Using SNMPv3

The Simple Network Management Protocol version 3 (SNMPv3) provides user authentication and data encryption to manage network devices securely. To manage your network machine securely, we recommend using the SNMPv3 protocol when you use BRAdmin Professional 4.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Network > Protocol**.

Start from ≡, if the navigation menu is not shown on the left side of the screen.

5. Make sure the **SNMP** setting is enabled, and then click **Advanced Settings**.
6. Configure the SNMP settings. There are three options for **SNMP Mode of Operation**.

Option	Description
SNMP v1/v2c read-write access	The scan server uses version 1 and version 2c of the SNMP protocol. You can use all Brother applications in this mode. However, it is not secure since it will not authenticate the user, and data will not be encrypted.
SNMPv3 read-write access and v1/v2c read-only access	The scan server uses the read-write access of version 3 and the read-only access of version 1 and version 2c of the SNMP protocol.  When you use SNMPv3 read-write access and v1/v2c read-only access mode, some Brother applications (such as BRAdmin Light) that access the scan server do not work correctly since they authorize the read-only access of version 1 and version 2c. If you want to use all applications, we recommend using the SNMP v1/v2c read-write access mode.
SNMPv3 read-write access	The scan server uses version 3 of the SNMP protocol. If you want to manage the scan server securely, use this mode.  When you use the SNMPv3 read-write access mode, note the following: • You can use only BRAdmin Professional or Web Based Management to manage the scan server. • Except for BRAdmin Professional, all applications that use SNMPv1/v2c will be restricted. To allow the use of SNMPv1/v2c applications, use the SNMPv3 read-write access and v1/v2c read-only access or SNMP v1/v2c read-write access mode.

7. Click **Submit**.

Use IEEE 802.1x Authentication for a Wired or a Wireless Network

- [What Is IEEE 802.1x Authentication?](#)
- [Configure IEEE 802.1x Authentication for a Wired or a Wireless Network Using Web Based Management \(Web Browser\)](#)
- [IEEE 802.1x Authentication Methods](#)

What Is IEEE 802.1x Authentication?

IEEE 802.1x is an IEEE standard for wired and wireless networks that limits access from unauthorised network devices. Your Brother machine (supplicant) sends an authentication request to a RADIUS server (Authentication server) through your access point or HUB. After your request has been verified by the RADIUS server, your machine can access the network.

Related Information

- [Use IEEE 802.1x Authentication for a Wired or a Wireless Network](#)
-

Configure IEEE 802.1x Authentication for a Wired or a Wireless Network Using Web Based Management (Web Browser)

- If you configure your machine using EAP-TLS authentication, you must install the client certificate issued by a CA before you start configuration. Contact your network administrator about the client certificate. If you have installed more than one certificate, we recommend writing down the certificate name you want to use.
- Before you verify the server certificate, you must import the CA certificate issued by the CA that signed the server certificate. Contact your network administrator or your Internet Service Provider (ISP) to confirm whether a CA certificate import is necessary.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Do one of the following:
 - For the wired network
Click **Wired** > **Wired 802.1x Authentication**.
 - For the wireless network
Click **Wireless** > **Wireless (Enterprise)**.
6. Configure the IEEE 802.1x authentication settings.

- To enable IEEE 802.1x authentication for wired networks, select **Enabled** for **Wired 802.1x status** on the **Wired 802.1x Authentication** page.
- If you are using **EAP-TLS** authentication, you must select the client certificate installed (shown with certificate name) for verification from the **Client Certificate** drop-down list.
- If you select **EAP-FAST**, **PEAP**, **EAP-TTLS**, or **EAP-TLS** authentication, select the verification method from the **Server Certificate Verification** drop-down list. Verify the server certificate using the CA certificate, imported to the machine in advance, issued by the CA that signed the server certificate.

Select one of the following verification methods from the **Server Certificate Verification** drop-down list:

Option	Description
No Verification	The server certificate can always be trusted. The verification is not performed.
CA Cert.	The verification method to check the CA reliability of the server certificate, using the CA certificate issued by the CA that signed the server certificate.

Option	Description
CA Cert. + ServerID	The verification method to check the common name ¹ value of the server certificate, in addition to the CA reliability of the server certificate.

7. When finished with configuration, click **Submit**.

-

¹ The common name verification compares the common name of the server certificate to the character string configured for the **Server ID**. Before you use this method, contact your system administrator about the server certificate's common name and then configure **Server ID**.

IEEE 802.1x Authentication Methods

EAP-FAST

Extensible Authentication Protocol-Flexible Authentication via Secured Tunneling (EAP-FAST) has been developed by Cisco Systems, Inc., which uses a user ID and password for authentication, and symmetric key algorithms to achieve a tunnelled authentication process.

The Brother machine supports the following inner authentication methods:

- EAP-FAST/NONE
- EAP-FAST/MS-CHAPv2
- EAP-FAST/GTC

PEAP

Protected Extensible Authentication Protocol (PEAP) is a version of EAP method developed by Cisco Systems, Inc., Microsoft Corporation and RSA Security. PEAP creates an encrypted Secure Sockets Layer (SSL)/Transport Layer Security (TLS) tunnel between a client and an authentication server, for sending a user ID and password. PEAP provides mutual authentication between the server and the client.

The Brother machine supports the following inner authentications:

- PEAP/MS-CHAPv2
- PEAP/GTC

EAP-TTLS

Extensible Authentication Protocol-Tunneled Transport Layer Security (EAP-TTLS) has been developed by Funk Software and Certicom. EAP-TTLS creates a similar encrypted SSL tunnel to PEAP, between a client and an authentication server, for sending a user ID and password. EAP-TTLS provides mutual authentication between the server and the client.

Your Brother machine supports only MS-CHAPv2 as an internal authentication method.

EAP-TLS

Extensible Authentication Protocol-Transport Layer Security (EAP-TLS) requires digital certificate authentication both at a client and an authentication server.

Before Using Secure Function Lock 3.0

Related Models: ADS-4700W/ADS-4900W

Secure Function Lock lets you restrict public access to the following machine operations:

- Scan to Web (supported models only)
- Scan to PC/Scan to Workflow
- Scan to Network
- Scan to FTP/SFTP
- Scan to Email Server
- Scan to SharePoint (supported models only)
- Scan to Apps (supported models only)
- Scan to USB
- Scan to WSS (Web Service Scan) (supported models only)

Secure Function Lock also prevents users from changing the default settings from the machine by limiting access to the machine's settings.

Before using the security features you should first enter an administrator password. The administrator can set up restrictions for individual users along with a user password. Carefully write down your password. If you forget it, you will have to reset the password stored in the machine. For more information about how to reset the password, contact Brother customer service.

- Only administrators can set limitations and make changes for each user.
- When Secure Function Lock is enabled, the machine is in Public Mode. To access any machine functions that have been restricted using Secure Function Lock, press , select your user name, and enter your password.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
For example:
https://192.168.1.2
3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Network > Protocol**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. In the **SMTP** field, click **Advanced Settings** and make sure the status of **SMTP** is **Enabled**.
6. Configure the **SMTP** settings.
 - Confirm that the email settings are correct after configuration by sending a test email.
 - If you do not know the SMTP server settings, contact your network administrator or Internet Service Provider (ISP).
7. When finished, click **Submit**.
8. Follow the instructions in the dialog box to test the current settings.

Related Information

- [Send an Email Securely](#)

Related Topics:

- [Access Web Based Management](#)

Send an Email with User Authentication

Your machine supports the SMTP-AUTH method to send email via an email server that requires user authentication. This method prevents unauthorised users from accessing the email server.

You can use the SMTP-AUTH method for email notification and email reports (available for certain models).

We recommend using Web Based Management to configure the SMTP authentication.

Email Server Settings

You must configure your machine's SMTP authentication method to match the method used by your email server. For details about your email server settings, contact your network administrator or Internet Service Provider (ISP).

To enable SMTP server authentication: in the Web Based Management **SMTP** screen, under **Server Authentication Method**, you must select **SMTP-AUTH**.

Related Information

- [Send an Email Securely](#)
-

Send an Email Securely Using SSL/TLS

Your machine supports SSL/TLS communication methods. To use an email server that is using SSL/TLS communication, you must configure the following settings.

We recommend using Web Based Management to configure SSL/TLS.

Verify Server Certificate

If you need to verify the server certificate, select the **Verify Server Certificate** checkbox under **SSL/TLS**.

Before you verify the server certificate, you must import the CA certificate issued by the CA that signed the server certificate. Contact your network administrator or your Internet Service Provider (ISP) to confirm if importing a CA certificate is necessary.

Port Number

If you select **SSL**, or **TLS**, the **Port** value will be changed to match the protocol. To change the port number manually, type the port number after you select **SSL/TLS** settings.

You must configure your machine's communication method to match the method used by your email server. For details about your email server settings, contact your network administrator or your ISP.

In most cases, the secured webmail services require the following settings:

SMTP	Port	587
	Server Authentication Method	SMTP-AUTH
	SSL/TLS	TLS

Certain websites provide services that allow users to upload and view images and files on the website. Your Brother machine can scan images and upload them to these services.

1. Scanning
2. Photos, images, documents and other files
3. Web Service

To use Brother Web Connect, your Brother machine must be connected to a network that has access to the Internet, through either a wired or wireless connection.

For network setups that use a proxy server, the machine must also be configured to use a proxy server. If you are unsure of your network configuration, check with your network administrator.

A proxy server is a computer that serves as an intermediary between computers without a direct Internet connection, and the Internet.

Press ([to Web]) or ([Apps]) on the touchscreen to use Brother Web Connect.

Online Services Used with Brother Web Connect

Related Models: ADS-4700W/ADS-4900W

Use Brother Web Connect to access online services from your Brother machine. Some of these web services offer business versions.

To use Brother Web Connect, you must have an account with the online service you want to use. If you do not already have an account, use a computer to access the service's website and create an account.

Google Drive™

An online document storage, editing, sharing and file synchronisation service.

URL: drive.google.com

Evernote®

An online file storage and management service.

URL: www.evernote.com

Dropbox

An online file storage, sharing and synchronisation service.

URL: www.dropbox.com

OneDrive

An online file storage, sharing and management service.

URL: <https://onedrive.live.com>

Box

An online document editing and sharing service.

URL: www.box.com

OneNote

An online document editing and sharing service.

URL: www.onenote.com

SharePoint Online

An online content storage, sharing, and managing service for businesses.

For more information about any of these services, refer to the respective service's website.

The following table describes which file types can be used with each Brother Web Connect feature:

Accessible Services	Google Drive™ Evernote® Dropbox OneDrive Box OneNote SharePoint Online
Upload scanned images	JPEG PDF DOCX XLSX PPTX TIFF

- Not all services are available in all countries.

- For Hong Kong, Taiwan and Korea:

Brother Web Connect supports only file names written in English. Files named in the local language will not be downloaded.

Brother Web Connect Setup Overview

Related Models: ADS-4700W/ADS-4900W

Configure the Brother Web Connect settings using the following procedure:

Step 1: Create an account with the service you want to use.

Access the service's website using a computer and create an account. (If you already have an account, there is no need to create an additional account.)

1. User registration
2. Web Service
3. Obtain account

Step 2: Apply for Brother Web Connect access.

Start Brother Web Connect access using a computer and obtain a temporary ID.

1. Enter account information
2. Brother Web Connect application page
3. Obtain temporary ID

Step 3: Register your account information on your machine so you can access the service you want to use.

Enter the temporary ID to enable the service on your machine. Specify the account name as you would like it to be displayed on the machine, and enter a PIN if you would like to use one.

1. Enter temporary ID
2. Web Service

Your Brother machine can now use the service.

Create an Account for Each Online Service Before Using Brother Web Connect

Related Models: ADS-4700W/ADS-4900W

To use Brother Web Connect to access an online service, you must have an account with that online service. If you do not already have an account, use a computer to access the service's website and create an account. After creating an account, log on and use the account once with a computer before using the Brother Web Connect feature. Otherwise, you may not be able to access the service using Brother Web Connect.

If you already have an account, there is no need to create an additional account.

After you finish creating an account with the online service you want to use, apply for Brother Web Connect access.

Related Information

- [Set Up Brother Web Connect](#)

Apply for Brother Web Connect Access

Related Models: ADS-4700W/ADS-4900W

To use Brother Web Connect to access online services, you must first apply for Brother Web Connect access using a computer that has the Brother Software installed.

1. Access the Brother Web Connect application website:

Option	Description
Windows	Launch  (Brother Utilities), and then click the drop-down list and select your model name (if not already selected). Click Do More in the left navigation bar, and then click Brother Web Connect .  You can also access the website directly: Type bwc.brother.com into your web browser's address bar.

Mac	Type bwc.brother.com into your web browser's address bar.

The Brother Web Connect page launches.

2. Select the service you want to use.
3. Follow the on-screen instructions and apply for access.

NOTE

When using SharePoint Online, follow the on-screen instructions to register a document library.

When finished, your temporary ID appears.

4. Make a note of your temporary ID, as you will need it to register accounts to the machine. The temporary ID is valid for 24 hours.
5. Close the web browser.

Now that you have a Brother Web Connect access ID, you must register this ID on your machine, and then use your machine to access the web service you want to use.

Register an Account on Your Brother Machine for Brother Web Connect

Related Models: ADS-4700W/ADS-4900W

You must enter your Brother Web Connect account information and configure your machine so that it can use Brother Web Connect to access the service you want.

- You must apply for Brother Web Connect access to register an account on your machine.
- Before you register an account, confirm that the correct date and time are set on the machine's control panel.

1. Press the [Basic 2] tab in the Home screen, and then press [to Web].

- If information regarding the Internet connection appears on the machine's LCD, read the information and press [OK].
- Occasionally, updates or announcements about Brother Web Connect's features will appear on the LCD. Read the information, and then press [OK].

2. Press ◀ or ▶ to display the service with which you want to register.

Press the service name.

3. If information regarding Brother Web Connect appears, press [OK].

4. Press [Register/Delete Account] > [Register Account].

5. The machine will prompt you to enter the temporary ID you received when you applied for Brother Web Connect access.

Press [OK].

6. Enter the temporary ID using the LCD, and then press [OK].

An error message will appear on the LCD if the information you entered does not match the temporary ID you received when you applied for access, or if the temporary ID has expired. Either enter the temporary ID correctly, or apply for access again and receive a new temporary ID.

7. The machine will prompt you to enter the account name that you want to be displayed on the LCD.

Press [OK].

8. Enter the name using the LCD, and then press [OK].

9. Do one of the following:

- To set a PIN for the account, press [Yes]. (A PIN prevents unauthorised access to the account.) Enter a four-digit number and press [OK].
- If you do not want to set a PIN, press [No].

When the account information you entered appears, confirm that it is correct.

10. Press [Yes] to register your information as entered.

11. Press [OK].

Account registration is complete and your machine can now access the service.

12. Press .

Scan and Upload Documents Using Brother Web Connect

Related Models: ADS-4700W/ADS-4900W

Upload your scanned photos and documents directly to a web service without using a computer.

- When scanning and uploading JPEG files or searchable PDF, monochrome scanning is not available.
- When scanning and uploading Microsoft Office files, monochrome scanning and grey scanning are not available.
- When scanning and uploading JPEG files, each page is uploaded as a separate file.
- Uploaded documents are saved in an album named **From_BrotherDevice**.

For information regarding restrictions, such as the size or number of documents that can be uploaded, refer to the respective service's website.

If you are a restricted Web Connect user due to the Secure Function Lock feature (available for certain models), you cannot upload the scanned data.

1. Load your document.
2. Press the [Basic 2] tab in the Home screen, and then press [to Web].

- If information regarding the Internet connection appears on the machine's LCD, read the information and press [OK].
- Occasionally, updates or announcements about Brother Web Connect's features will appear on the LCD. Read the information, and then press [OK].

3. Press ◀ or ▶ to display the service that hosts the account to which you want to upload.
Press the service name.
4. Press ▲ or ▼ to display your account name, and then press it.
5. If the PIN entry screen appears, enter the four-digit PIN and press [OK].
6. Follow the on-screen instructions to complete this operation.

Error and Maintenance Messages

Related Models: ADS-4700W/ADS-4900W

As with any sophisticated office product, errors may occur and supply items must be replaced eventually. If this happens, your machine identifies the error or required routine maintenance and displays the appropriate message. The most common error and maintenance messages are shown in the table below.

You can correct most errors and clear routine maintenance messages yourself. If you need further information, go to your model's **FAQs & Troubleshooting** page at support.brother.com.

Error Message	Cause	Action
Access Denied	Secure Function Lock is On.	Contact your administrator to check your Secure Function Lock settings. <i>See Related Information: Use Secure Function Lock 3.0.</i>
Cannot Find Workflow (ADS-4700W/ADS-4900W)	- Workflow was not created. - Workflow was deleted. - Workflow was not configured correctly.	Make sure that Workflow is created and configured correctly in Brother iPrint&Scan (for Windows and Mac). <i>See Related Information: Configure Scan to Workflow Settings Using Brother iPrint&Scan.</i>
Check Connection	The machine is not connected to the network.	Check the network connection.
	The computer and machine are not connected using a USB cable.	Connect the USB cable. If a USB flash drive is inserted into the machine, remove it.
Connection Failed	The machine could not connect to the network.	Check the following: - The PIN is correct. - You did not press the WPS button on more than one wireless access point/router. - The wireless access point/router is turned on. - Restart the machine and the wireless access point/router.
Document Jam	- The Paper Guides are not set to the correct document size. - The settings are not appropriate for your document. - Paper dust has accumulated on the surface of the Pick Up Roller or Brake Roller. - The document was curled. - The Extendable Output Tray is not set to the correct length. (ADS-4700W/ADS-4900W) The Document Separation Switch is set to  (Continuous Feed Mode) when scanning a document that is folded in half.	Clear the document jam, and then do the following: - Gently adjust the Paper Guides to fit the width of your document. When Scan Size is set to Auto and you are scanning a document that contains multiple page sizes, insert narrow pages straight and as close to the centre of the machine as possible. If the document does not feed straight, use the Continuous Scan option. - Confirm the settings. <i>See Related Information: Document Jam.</i> - Clean the Pick Up Roller and Brake Roller. <i>See Related Information: Clean the Scanner and Rollers.</i> - Straighten the curled document and scan again.

Error Message	Cause	Action
		- Set the Extendable Output Tray to the correct length. (ADS-4700W/ADS-4900W) Set the Document Separation Switch to  (Manual Single Mode).
Incorrect PIN	The PIN Number entered in Secure Function Lock was incorrect.	Enter the correct PIN Number. Contact your administrator to check your Secure Function Lock settings. <i>See Related Information: Use Secure Function Lock 3.0.</i>
Insufficient USB Storage	The inserted USB flash drive is full.	Press Close, and then do one of the following: - Delete unused files or folders from the USB flash drive, and then try again. - Use a USB flash drive that has more free space.
No Access Point	The machine cannot detect a wireless access point/router that has an active WPS function.	Check the following: - You did not press the WPS button on two or more wireless access point/routers. - Restart the machine and the wireless access point/router.
No Certificate	The certificate does not exist, or is corrupted.	Configure the settings under Signed PDF in the Administrator menu in Web Based Management.
No PC found	The machine is not connected to your computer.	Connect the machine to your computer, and then try again. If a USB flash drive is inserted into the machine, remove it.
No Profile found (ADS-4700W/ADS-4900W)	No Scan to FTP/SFTP profile, Scan to Network profile, or Scan to SharePoint profile is registered.	Configure the Scan to FTP/SFTP profile, the Scan to Network profile, or the Scan to SharePoint profile before using these scanning features. <i>See Related Information: Set up a Scan to FTP Profile.</i> <i>See Related Information: Set up a Scan to SFTP Profile.</i> <i>See Related Information: Set up a Scan to Network Profile.</i> <i>See Related Information: Set up a Scan to SharePoint Profile.</i>
Not Registered	(Scan) You tried to access an email address that has not been registered in the address book.	Make sure the email address is correctly configured.
	(Secure Function Lock) A user not registered in Secure Function Lock is accessing the machine.	Contact your administrator to check your Secure Function Lock settings. <i>See Related Information: Use Secure Function Lock 3.0.</i>
Remove documents	Auto Start Scan Mode was enabled while a document was loaded.	Remove the document, and then reload it.
Replace Pickup Roller	(ADS-4700W) All Rollers have been used over 100,000 times. (ADS-4900W) All Rollers have been used over 200,000 times.	Replace all rollers with new ones. Scanning errors may occur if you do not replace the part.

Error Message	Cause	Action
		See <i>Related Information: Replace the Roller Kit</i> .
Scheduled Maintenance Alert	The Pick Up Roller has been used over 5,000 times.	Clean the Brake Roller and Pick Up Roller. Paper jams and reduced scan quality issues may occur if you do not clean them. See <i>Related Information: Clean the Scanner and Rollers</i> .
Sending Error (ADS-4700W/ADS-4900W)	The Scan to FTP/SFTP profile, Scan to Network profile, Scan to SharePoint profile, or Scan to Email Server is not configured correctly.	Make sure the Scan to FTP/SFTP profile, Scan to Network profile, Scan to SharePoint profile, or Scan to Email Server is configured correctly. Configure the Network Settings.
Server Time out	The machine was disconnected from the Scan to FTP/SFTP profile, Scan to Network profile or Scan to Email Server.	Make sure the Scan to FTP/SFTP profile, Scan to Network profile or Scan to Email Server is configured correctly. Configure the Network Settings.
Unusable Device	An unusable device is inserted in the USB port.	Remove the device. Turn the machine off by unplugging the machine from the electrical socket, and then plug the machine in again. Press  to turn the machine on.
	The inserted USB flash drive is write-protected.	Use a USB flash drive that is not write-protected.
USB Access Error	The USB flash drive was removed while it was being accessed.	Insert the USB flash drive.
USB hub not supported	A USB flash drive with a hub is inserted in the USB port.	Remove the unsupported device from the USB port.
Wrong Network Key	The Network Key is incorrect.	Confirm the Network Key and try again.

Error Messages When Using the Brother Web Connect Feature

Related Models: ADS-4700W/ADS-4900W

Your Brother machine displays an error message if an error occurs. The most common error messages are shown in the chart.

You can correct most errors yourself. If you need more tips, go to your model's **FAQs & Troubleshooting** page at support.brother.com.

Connection Error

Error Messages	Cause	Action
Connection Error 02	The machine is not connected to a network.	- Verify that the network connection is good. - If the to Web or Apps option was pressed soon after the machine was turned on, the network connection may not have been established yet. Wait and try again.
Connection Error 03	- Network or server settings are incorrect. - There is a problem with the network or server.	- Confirm that network settings are correct, or wait and try again later. - If the to Web or Apps option was pressed soon after the machine was turned on, the network connection may not have been established yet. Wait and try again.
Connection Error 07	Date and time settings are incorrect.	Set the date and time correctly. Note that if the machine's power cord is disconnected, the date and time settings may have reset to factory settings.

Authentication Error

Error Messages	Cause	Action
Authentication Error 01	The PIN you entered to access the account is incorrect. The PIN is the four-digit number that was entered when registering the account to the machine.	Enter the correct PIN.
Authentication Error 02	The temporary ID that was entered is incorrect.	Enter the correct temporary ID.
	The temporary ID that was entered has expired. A temporary ID is valid for 24 hours.	Apply for Brother Web Connect access again and receive a new temporary ID, and then use the new ID to register the account to the machine.
Authentication Error 03	The name you entered as the display name has already been registered to another service user.	Enter a different display name.

Server Error

Error Messages	Cause	Action
Server Error 01	The machine's authentication information (needed to access the service) has expired or is invalid.	Apply for Brother Web Connect access again to receive a new temporary ID, and then use the new ID to register the account to the machine.
Server Error 03	The file you are trying to upload may have one of the following problems: • The file exceeds the service's limit on number of pixels, file size, etc. • The file type is not supported. • The file is corrupted.	The file cannot be used: • Check the service's size or format restrictions. • Save the file as a different type. • If possible, get a new, uncorrupted version of the file.
Server Error 13	There is a problem with the service and it cannot be used now.	Wait and try again. If you get the message again, access the service from a computer to confirm if it is unavailable.

Shortcut Error

Error Messages	Cause	Action
Shortcut Error 02	The shortcut cannot be used because the account was deleted after the shortcut was registered.	Delete the shortcut, and then register the account and shortcut again.

Error and Maintenance Indications

Related Models: ADS-4300N

The LED indications on the control panel are explained in this table.

If there is an error that you cannot clear yourself, contact your Brother dealer or Brother customer service.

Error Indicator	Power Indicator	Description
		The LED is off.
		The LED is on.
		The LED is blinking.

Error Indicator	Power Indicator	Machine Status
		Document Jam Clear the document jam. If scanning a long document, select Long Paper from the Scan Size or Document Size drop-down list.
		Pick Up Document Error The machine cannot pick up the document. Open the Front Cover and remove the document. Close the Front Cover and reload your document.
		Multifeed Detection Error More than one page was fed at one time or the original document contains multiple paper lengths. Clear the multifeed, check your paper lengths, and then try to scan again.
		Front Cover Open The Front Cover is open.
		Access Error - Scan to PC The USB cable is not connected to the machine. Connect the USB cable. - Scan to USB - A USB flash drive is not inserted into the machine. Insert a USB flash drive. - The USB flash drive was removed while it was being accessed. Reinsert the USB flash drive.
		Unusable Device An unsupported USB device is inserted in the USB port. Remove the device.
		Too Many Files on USB (Scan to USB) Your machine cannot save to a USB flash drive if it contains too many files. Remove the USB flash drive, and then do one of the following: - Delete unused files or folders from the USB flash drive, and then try again. - Use a USB flash drive that has available space.

Error Indicator	Power Indicator	Machine Status
		Updating the Firmware Firmware update in progress. Wait for the update to complete.
		The Scheduled Maintenance counter has exceeded 5,000. Confirm the remaining life in the Machine Info dialog box using Remote Setup. If the Scheduled Maintenance counter has exceeded the limit, clean the machine promptly. If you do not, document jams and paper feed problems may occur. After cleaning the machine, reset the Scheduled Maintenance Counter using Remote Setup. See <i>Related Information: Clean the Scanner and Rollers</i> .
		The Pick Up Roller has been used more than 100,000 times. Confirm the remaining life in the Machine Info dialog box using Remote Setup. If the Pick Up Roller or Brake Roller have been exceeded their usage limit, replace them and then reset the Roller Counter using Remote Setup. See <i>Related Information: Replace the Roller Kit</i> .

For more information about errors, check your machine's status in Brother iPrint&Scan (for Windows and Mac).

Document Jam

Documents can jam in the ADF unit if they are not inserted or fed correctly, if they are too long, or if multiple pages are fed at the same time (multifeed).

1. Remove any paper from the ADF that is not jammed.
2. Press the release tab (1) to open the Front Cover.

3. Gently pull the jammed document out of the machine.

Check for ripped paper inside the machine. Remove any paper scraps you find inside the machine.

4. Close the Front Cover.

When clearing the multifeed, confirm that the data scanned before the multifeed was detected has been saved, and then start scanning again from the next page or the beginning of the document.

IMPORTANT

- To avoid damage to the jammed document, DO NOT pull the document out before opening the Front Cover.
- Take out any paper from the ADF before closing the Front Cover.
- To avoid future document jams, do the following:
 - Close the Front Cover correctly by pushing it gently in the centre.
 - Configure the settings for your document correctly.
 - Fan the paper to help prevent document jams and multi-feeding documents.
 - Clean the Brake Roller and Pick Up Roller. See *Related Information: Clean the Scanner and Rollers*.
 - Stagger the pages and then load your document.
 - Make sure your document is acceptable for the machine.
 - Load your document correctly.

-
- Make sure the maximum number of pages is appropriate for your document.
 - When using long paper, to avoid a paper jam, you must select the **Long Paper** option from the **Document Size** menu.
-

Scanning and Other Problems

Scanning Difficulties

Difficulties	Cause	Suggestions
TWAIN or WIA errors appear when starting to scan. (Windows)	The TWAIN or WIA driver has not been selected as the primary source in your scanning application.	Make sure the Brother TWAIN or WIA driver is selected as the primary source in your scanning application. For example, in Nuance™ PaperPort™ 14SE, click Scan Settings > Select . Select the Brother TWAIN/WIA driver.
TWAIN errors appear when starting to scan. (Mac)	The TWAIN driver has not been selected as the primary source in your scanning application.	Make sure the Brother TWAIN driver is selected as the primary source in your application.
Vertical lines are seen in the scanned image.	Paper dust has accumulated on the surface of the glass strips.	Clean the glass strips inside the machine. <i>See Related Information: Clean the Scanner and Rollers.</i>
The scanned image is missing.	The Paper Guides are not adjusted to fit the width of the document.	Gently adjust the Paper Guides to fit the width of your document. When Scan Size is set to Auto and you are scanning a document that contains multiple page sizes, insert narrow pages straight and as close to the centre of the machine as possible. If the document does not feed straight, use the Continuous Scan option.
	The settings are not appropriate for your document. For example, a Letter/A4-sized document was fed when Executive/A5 was selected as the document size.	Make sure the document size settings are appropriate for your document. Configure the margin settings and adjust the scanning position.
	-	Configure the margin settings and adjust the scanning position.
The scanned image is skewed. (ADS-4700W/ ADS-4900W)	If you use a preset document size, the document skewing cannot be corrected automatically.	Select Auto for Document Size .
The scanned image is skewed.	The Paper Guides are not adjusted to fit the width of the document.	Gently adjust the Paper Guides to fit the width of your document. When Scan Size is set to Auto and you are scanning a document that contains multiple page sizes, insert narrow pages straight and as close to the centre of the machine as possible. If the document does not feed straight, use the Continuous Scan option.
	The Long Paper setting is selected.	Select a setting other than Long Paper.
	The document was curled.	Straighten the curled document and scan again.
Scanning is too slow.	The resolution is not appropriate for your document.	Decrease the scanner resolution.
Scanning has stopped.	The memory is full.	- Close other applications before scanning. - Windows Adjust the data transfer rate in the Optimize Data Transfer menu of the TWAIN driver or in Brother iPrint&Scan.

Difficulties	Cause	Suggestions
The document was not fed.	Paper dust has accumulated on the surface of the Pick Up Roller or Brake Roller.	Clean the Brake Roller and Pick Up Roller. See <i>Related Information: Clean the Scanner and Rollers</i> .
	Too many documents are loaded in the ADF at a time.	Make sure you do not exceed the ADF's capacity. See <i>Related Information: Acceptable Documents</i> .
	There are foreign objects in the ADF.	Remove any foreign objects or ripped paper from the ADF.
	Your media is too thin or too thick.	Make sure your media is acceptable for the machine. See <i>Related Information: Acceptable Documents</i> .
	Remote Setup is in progress.	Cancel Remote Setup.
	Paper ejection has paused.	Remove any paper from the ADF.
	The document was curled.	Straighten the curled document and scan again.
The machine fed multiple documents but scanned only the first document.	Document Separation Switch is set to  (Manual Single Mode).	Set the Document Separation Switch to  (Continuous Feed Mode) and scan again.
The document is jammed.	Paper dust has accumulated on the surface of the Pick Up Roller or Brake Roller.	Clean the Brake Roller and Pick Up Roller. See <i>Related Information: Clean the Scanner and Rollers</i> .
	There are foreign objects in the ADF.	Remove any foreign objects or ripped paper from the ADF.
	Your document is not acceptable for the machine.	Make sure your document is acceptable for the machine. See <i>Related Information: Acceptable Documents</i> .
	The document was curled.	Straighten the curled document and scan again.
	The Document Separation Switch is set to  (Continuous Feed Mode) when scanning documents folded in half, envelopes, or Multi-Layered Transfer Paper.	Set the Document Separation Switch to  (Manual Single Mode) and scan again.
	The Extendable Output Tray is not set to the correct length.	Set the Extendable Output Tray according to the length of the document.
The output documents are scattered.	The Extendable Output Tray is not set to the correct length.	Set the Extendable Output Tray according to the length of the document.
The scan quality is poor.	Paper dust has accumulated on the surface of the Pick Up Roller or Brake Roller.	Clean the Brake Roller and Pick Up Roller. See <i>Related Information: Clean the Scanner and Rollers</i> .
	Paper dust has accumulated on the surface of the glass strips inside the machine.	Clean the glass strips inside the machine. See <i>Related Information: Clean the Scanner and Rollers</i> .
	The scanner resolution is too low.	Increase the scanner resolution.
Bleedthrough is seen in the scanned data.	The settings are not appropriate for the type of document being scanned.	Select the Remove Bleed-through / Pattern / Remove Background Colour checkbox.

Difficulties	Cause	Suggestions
Colours in the scanned data are dark.	The settings are not appropriate for the type of document being scanned.	Do one of the following: - Select the Remove Bleed-through / Pattern / Remove Background Colour checkbox, and then scan from your computer. - Increase the Brightness, and then scan from your computer. - Increase the Contrast, and then scan from your computer. - Change the Colour Setting/Scan Type to Grey or Colour, and then scan from your computer.
A page that is not a blank page is skipped.	- The document is too faint. - Skip Blank Page is set to On.	Set Skip Blank Page to Off. Alternatively, reduce the Skip Blank Page sensitivity.
Cannot scan a long document.	Long Paper is not selected for the document size.	Select Long Paper for the document size. To select Long Paper when scanning from the machine's Control Panel, use the following settings: 2-sided Scan: Off - Colour Setting: Other than Auto - Resolution: Lower than 300 dpi - Skip Blank Page: Off Then, you can select Long Paper for the document size.
A multifeed occurs.	The document is not loaded correctly.	Load your document correctly, and then try again.
	The document was curled.	Straighten the curled document and scan again.
Multifeed cannot be detected even if the Multifeed Detection setting is on.	The documents are too thin.	If the documents are too thin, they may not be detected by the sensor. Scan pages one by one.
Cannot scan.	Secure Function Lock is on. (ADS-4700W/ADS-4900W)	Contact your administrator to check your Secure Function Lock settings. <i>See Related Information: Use Secure Function Lock 3.0.</i>
	The Pull Scan option in the Scan from PC menu in Web Based Management is disabled.	Enable the Pull Scan option.
Cannot scan to a computer from the machine.	- Scanning application (for example, Brother iPrint&Scan) is not installed on the computer. - The settings are not configured within the scanning application (for example, Brother iPrint&Scan).	- Install a scanning application (for example, Brother iPrint&Scan). - Configure the settings using a scanning application (for example, Brother iPrint&Scan).
Auto Start Scan does not start. (ADS-4700W/ADS-4900W)	The settings for Auto Start Scan (Shortcut 57) are incorrect.	Confirm the settings for Auto Start Scan (Shortcut 57).
Cannot Scan to Workflow from the machine. (ADS-4700W/ADS-4900W)	The Scan to Workflow settings are not configured within Brother iPrint&Scan (for Windows and Mac).	Configure the settings using Brother iPrint&Scan (for Windows and Mac). <i>See Related Information: Configure Scan to Workflow Settings Using Brother iPrint&Scan.</i>

Software Difficulties

Difficulties	Cause	Suggestions
Cannot save the settings in Remote Setup or Web Based Management.	The machine is processing.	Wait until the machine finishes processing, and then try again.
Cannot start Remote Setup.	The machine is turned off.	Turn the machine on, and then try again.
	The machine is not connected to your computer.	Connect the machine to your computer, and then try again.
	An error is occurring.	Clear all errors, check the status is Ready on Remote Setup and then try again.
	The machine is scanning.	Wait until scanning has finished and try again.
	The machine is being configured from the machine's Control Panel. (ADS-4700W/ADS-4900W)	Stop configuring the machine from the Control Panel.
	A USB flash drive is inserted into the machine.	Remove the USB flash drive.
Cannot enter the IP address and Subnet Mask. (ADS-4700W/ADS-4900W)	"000.000.000.000." has already been entered.	Press  to delete the entered information, and then enter the correct information.
The computer has detected a USB flash drive.	A USB flash drive is inserted into the machine and the computer is connected to the machine using a USB cable.	The computer detects the USB flash drive that is inserted into the machine. Remove the USB flash drive so that the computer does not detect it.

Other Difficulties

Difficulties	Cause	Suggestions
The machine is in Sleep Mode (power save mode).	The machine is idle and the amount of time specified by the Sleep Mode setting has elapsed.	Do one of the following: - Press . - Press . (ADS-4700W/ADS-4900W) - Scan using your computer. - Open the Front Cover. - Load your document. - Touch the screen. (ADS-4700W/ADS-4900W) - Insert/disconnect the USB flash drive. - Insert/disconnect the USB cable from the machine or PC.
The machine is not turned on.	The machine was plugged in within 60 seconds after pulling out the plug.	Wait 60 seconds, and then turn the machine on.
Your computer cannot find the machine via USB interface.	A USB flash drive is inserted.	Remove the USB flash drive.
	The scanner driver is not installed.	Install the scanner driver.

Turn your wireless router off and back on. If that does not resolve the problem, try to configure the wireless settings again. If this still does not resolve the problem, use the Actions listed in this table.

Cause	Action	Interface
Your security settings (SSID/ Network Key (Password)) are not correct.	Confirm your security settings. - The manufacturer's name or model number of the wireless access point/router may be used as the default security settings. - See the instructions supplied with your wireless access point/router for information on how to find the security settings. - Ask the manufacturer of your wireless access point/router, your Internet provider, or your network administrator.	Wireless
Your Brother machine's MAC address is not allowed.	Confirm that the Brother machine's MAC Address is allowed in the filter. You can find the MAC address using the Brother machine's control panel.	Wireless
Your wireless access point/router is in stealth mode (not broadcasting the SSID).	- Enter the correct Network Name (SSID) and Network Key (Password) manually. - Check the Network Name (SSID) and Network Key (Password) in the instructions supplied with your wireless access point/router and reconfigure the wireless network setup.	Wireless
Your security settings (SSID/ Password) are not correct.	Confirm the Network Name (SSID) and Network Key (Password). When you are configuring the network manually, the SSID and password are displayed on your Brother machine. If your mobile device supports the manual configuration, the SSID and password will be displayed on your mobile device's screen.	Wi-Fi Direct
Your Brother machine is placed too far from your mobile device.	Move your Brother machine within about 1 metre of the mobile device when you configure the Wi-Fi Direct network settings.	Wi-Fi Direct
There are some obstructions (walls or furniture, for example) between your machine and the mobile device.	Move your Brother machine to an obstruction-free area.	Wi-Fi Direct
There is a wireless computer, Bluetooth®-supported device, microwave oven, or digital cordless phone near the Brother machine or the mobile device.	Move other devices away from the Brother machine or the mobile device.	Wi-Fi Direct
If you have checked and tried all of the actions, but still cannot complete the Wi-Fi Direct configuration.	Turn your Brother machine off and back on. Then try to configure the Wi-Fi Direct settings again.	Wi-Fi Direct
Your machine is in Sleep Mode and cannot configure the network settings on Web Based Management.	Turn off the Sleep Mode.	Wireless
The enterprise wireless network is not configured correctly.	Configure the settings in Web Based Management.	Wireless

Cause	Action	Interface
The current channel of your wireless LAN access point/router is not supported by your machine when you are trying to connect your machine to a 5 GHz Wi-Fi network. (ADS-4900W)	Change the channel on your wireless LAN access point/router to the channel supported by your machine. 1. Confirm the channels supported by your machine. Go to support.brother.com/g/d/a5m6/, select your product, and then click Download for more information. 2. Check your wireless LAN access point/router's channel setting. Make sure it is set to one of the channels supported by your machine and not set to "Auto" or "Automatic". For more information about changing the channel setting, see the instructions supplied with your wireless LAN access point/router. 3. Try to connect your machine to your Wi-Fi network again.	Wireless
Your Brother machine cannot connect to the Wi-Fi Direct and Wi-Fi networks at the same time on a 5 GHz Wi-Fi network. (ADS-4900W)	Use the 2.4 GHz band for the connection. Press  Settings > Network > WLAN (Wi-Fi) > 5GHz Frequency Band Enable and change the setting to Off.	Wireless/Wi-Fi Direct

Related Information

- [Network Problems](#)

Your Scanner Cannot Be Detected on the Network During Installation

Cause	Action
Your computer is not connected to the network.	Make sure your computer is connected to a network, for example, a Wireless LAN environment or has Internet access. For further support, contact your network administrator.
Your machine is not connected to the network.	(Wired network) - ADS-4700W/ADS-4900W Press  <code>Settings > Network > Wired LAN > Wired Status > Status</code>. If the LCD displays <code>Inactive</code> or <code>Off</code>, ask your network administrator if your IP address is valid. - ADS-4300N Ask your network administrator if your IP address is valid. (Wireless network) ADS-4700W/ADS-4900W Press  <code>Settings > Network > WLAN (Wi-Fi) > WLAN Status > Status</code>. If the LCD displays <code>Connection Failed</code>, ask your network administrator if your IP address is valid.
You use security software.	- In the installer dialog box, search for the Brother machine again. - Allow access when the alert message of the security software appears during the Brother Device installation. - The following port numbers are used for Brother network features: - Network scanning Port number 5566/Protocol TCP - Network scanning (Brother iPrint&Scan) Port number 54921/Protocol TCP - For more information about security software, see <i>Related Information: Your Brother Machine Cannot Scan over the Network</i>.
You use a Wi-Fi router.	The privacy separator on your Wi-Fi router may be enabled. Disable the privacy separator.
Your Brother machine is placed too far from the Wireless access point/router.	Place your Brother machine within about 1 metre of the Wireless access point/router when you configure the wireless network settings.
There are some obstructions (walls or furniture, for example) between your machine and the Wireless access point/router.	Move your Brother machine to an obstruction-free area, or closer to the Wireless access point/router.
There is a wireless computer, Bluetooth®-supported device, microwave oven, or digital cordless phone near the Brother machine or the Wireless access point/router.	Move all the devices away from the Brother machine or Wireless access point/router.

Your Brother Machine Cannot Scan over the Network

Cause	Action
You did not select Accept in the security alert dialog box during the Brother Device installation, applications' start-up process, or when using the scanning features.	If you did not select Accept in the security alert dialog box, the firewall function of your security software may be denying access. Some security software may block access without showing a security alert dialog box. To allow access, see your security software instructions or ask the manufacturer.
Your security software blocks your machine's access to the network. (The Network scanning feature does not work.)	- Windows Configure the third-party Security/Firewall Software to allow Network scanning. To add port 54925 for Network scanning, type the information below: - in Name: Type any description, for example Brother NetScan. - in Port number: Type 54925. - in Protocol: UDP is selected. See the instruction manual that came with your third-party Security/Firewall Software or contact the software manufacturer. - Mac Reinstall the driver.
Your security software blocks your machine's access to the network.	The following port numbers are used for Brother network features: - Network scanning Port number 5566/Protocol TCP - Network scanning (Brother iPrint&Scan) Port number 54921/Protocol TCP For information about how to open the port, see the security software instructions or ask the manufacturer.
Your Brother machine was not assigned an available IP address.	Confirm the IP address and the Subnet Mask. Verify that both the IP addresses and Subnet Masks of your computer and the Brother machine are correct and located on the same network. For more information about how to verify the IP address and the Subnet Mask, ask your network administrator.
You cannot connect the Brother machine to the network using wireless capabilities.	ADS-4700W/ADS-4900W Press  Settings > Network > WLAN (Wi-Fi) > WLAN Status > Status. If the LCD displays Connection Failed, ask your network administrator if your IP address is valid.
Because the machine does not support Kerberos authentication, Network scanning cannot be used.	Change the server settings or change the destination folder where your document will be stored in the Scan to Network Profile from Web Based Management.
Your Brother machine is connected to a different wireless network. (ADS-4900W)	Check the LCD to see your connection status.  Your machine is connected to the wireless network.  The wireless setting is disabled. To connect to the wireless network, press  > WLAN (Wi-Fi) Enable, and then change the setting to On.

Cause	Action
	 Your machine is connected to the Wi-Fi Direct network.  Your machine is not connected to the Wi-Fi Direct network. Press  > Wi-Fi Direct Enable, and then change the setting to On.

If you have checked and tried all of the actions, but your machine still cannot scan, uninstall the Brother software and drivers and reinstall them.

- [If You Want to Check that Your Network Devices are Working Correctly](#)

If You Want to Check that Your Network Devices are Working Correctly

Check	Action
Check that your Brother machine, access point/router, or network hub is turned on.	Check the following: - The power cord is connected correctly and the Brother machine is turned on. - The access point/router or hub is turned on and its link indicator is blinking. - All protective packaging has been removed from the machine. - The Front Cover, Brake Roller Cover and Pick-up Roller Cover are completely closed.
Check your Brother machine's network settings, such as IP address, or the link status.	- For Web Based Management (supported models only) Start Web Based Management and access your Brother machine. When the Web Based Management screen appears, click Network > Network > Network Status. - For your machine's LCD (supported models only) (Wired network) ADS-4700W/ADS-4900W Press  Settings > Network > Wired LAN > Wired Status > Status. If the LCD displays Inactive or Off, ask your network administrator if your IP address is valid. (Wireless network) ADS-4700W/ADS-4900W Press  Settings > Network > WLAN (Wi-Fi) > WLAN Status > Status. If the LCD displays Connection Failed, ask your network administrator if your IP address is valid.
Check that you can "ping" the Brother machine from your computer.	Ping the Brother machine from your computer using the IP address or the node name in the Windows command prompt or Mac Terminal application: ping <ipaddress> or <nodename>. - Successful: Your Brother machine is working correctly and connected to the same network as your computer. - Unsuccessful: Your Brother machine is not connected to the same network as your computer. - Confirm that the IP address and the Subnet Mask are set correctly.

If you have checked and tried all of the actions but you are still having problems, see the instructions supplied with your wireless access point/router to find the SSID and the Network Key (Password) information and set them correctly.

Check the Serial Number

>> ADS-4300N

>> ADS-4700W/ADS-4900W

ADS-4300N

1. Do one of the following:

- Windows

Launch  (**Brother Utilities**), and then click the drop-down list and select your model name (if not already selected). Click **Tools** in the left navigation bar, and then click **Remote Setup**.

- Mac

In the **Finder** menu bar, click **Go > Applications > Brother**, select your model name, and then double-click the **Brother Remote Setup** icon.

If the Discover Devices dialog box appears, select your model name and then click **Connect**.

If your machine is connected via a network, we recommend using Web Based Management to check the information.

2. Click the **Machine Info** menu in the left navigation pane.

The window displays the **Serial Number** (the example below uses Windows).

ADS-4700W/ADS-4900W

Press  [Settings] > [Machine Info.] > [Serial No.].

The LCD displays [Serial No.].

Clean the Scanner and Rollers

A spot of dirt or correction fluid on the glass strip may cause poor quality scans. Clean the scanner and rollers if a vertical line appears in the scanned data or if areas are missing in the scanned data.

>> [ADS-4300N/ADS-4700W](#)

>> [ADS-4900W](#)

ADS-4300N/ADS-4700W

1. Press and hold  to turn the machine off.
2. Remove the ADF.

3. Press the release tab to open the Front Cover.

4. From the back of the machine, clean the glass strips (1) in the ADF unit with a soft lint-free cloth. Make sure that both glass strips are clean.

5. Press the upper left side of the Brake Roller Cover downwards and pull it down.

6. Hold the Brake Roller shaft and pull it towards you, and then remove the Brake Roller by pulling it out and to the right.

7. Clean the Brake Roller with a soft lint-free cloth slightly moistened with water.
8. Insert the Brake Roller into the shaft, and then insert the Brake Roller into the machine.

9. Close the Brake Roller Cover.
10. Clean the Pick Up Rollers from side to side with a soft lint-free cloth slightly moistened with water.

11. Close the Front Cover and attach the ADF.
12. Press  to turn the machine on.

NOTE

(ADS-4700W)

When [Scheduled Maintenance Alert] appears on the machine's LCD, you must clean the machine promptly. If you do not, document jams and paper feed problems may occur.

First, run your fingertip over the glass to see if you feel anything (dirt or debris). Clean the glass strips with a soft lint-free cloth. You may have to repeat the cleaning process three or four times. To test, scan a document after each cleaning attempt.

When there is a spot of dirt or correction fluid on the glass strip, the scanned sample shows a vertical line.

After the glass strip is cleaned, the vertical line is gone.

ADS-4900W

1. Press and hold  to turn the machine off.
2. Remove the ADF.

3. Press the release tab to open the Front Cover.

4. From the back of the machine, clean the glass strips (1) in the ADF unit with a soft lint-free cloth. Make sure that both glass strips are clean.

5. Press the both sides of the Brake Roller Cover inwards at the same time and pull the cover down.

6. Lift the Brake Roller with your finger to remove it.

7. Clean the Brake Roller with a soft lint-free cloth slightly moistened with water.
8. Fit the shaft of the Brake Roller into the slot in the opening and insert the Brake Roller into the machine.

9. Close the Brake Roller Cover.

10. Clean the Pick Up Roller from side to side with a soft lint-free cloth slightly moistened with water.

11. Close the Front Cover and attach the ADF.

12. Press  to turn the machine on.

NOTE

When [Scheduled Maintenance Alert] appears on the machine's LCD, you must clean the machine promptly. If you do not, document jams and paper feed problems may occur.

First, run your fingertip over the glass to see if you feel anything (dirt or debris). Clean the glass strips with a soft lint-free cloth. You may have to repeat the cleaning process three or four times. To test, scan a document after each cleaning attempt.

When there is a spot of dirt or correction fluid on the glass strip, the scanned sample shows a vertical line.

After the glass strip is cleaned, the vertical line is gone.

Replace the Roller Kit (ADS-4300N/ADS-4700W)

Related Models: ADS-4300N/ADS-4700W

Your machine is equipped with a scan counter that automatically counts how many times the machine has scanned. After approximately 100,000 scans, you may need to replace the Roller Kit.

After replacing the rollers, reset the Usage Counter so that the machine starts counting from 0.

1. Remove the ADF.

2. Press the release tab to open the Front Cover.

3. Press the right side of the Pick Up Roller Cover towards the left and pull it down.

-
4. Remove both Pick Up Rollers.

5. Fit the new Lower Pick Up Roller into the opening, and then slide it to the left onto the shaft.

6. Fit the new Upper Pick Up Roller into the opening, and then slide it to the left onto the shaft.

7. Close the Pick Up Roller Cover.

8. Turn the machine around, as shown.

CAUTION

Some areas of the machine can cause injury if the Front Cover (shaded area shown) is closed with force. Be careful when placing your hand in or near the shaded area.

9. Press the upper left side of the Brake Roller Cover downwards and pull it down.

10. Hold the Brake Roller shaft and pull it towards you, and then remove the Brake Roller by pulling it out and to the right.

11. Thread the new Brake Roller onto the shaft, and then insert the Brake Roller into the machine.

12. Close the Brake Roller Cover.

13. Close the Front Cover and turn the machine to face forwards.

14. Attach the ADF firmly until it locks into place.

15. Reset the Roller Counter:

- **ADS-4300N**

a. Do one of the following:

- Windows

Launch  (**Brother Utilities**), and then click the drop-down list and select your model name (if not already selected). Click **Tools** in the left navigation bar, and then click **Remote Setup**.

- Mac

In the **Finder** menu bar, click **Go > Applications > Brother**, select your model name, and then double-click the **Brother Remote Setup** icon.

If the Discover Devices dialog box appears, select your model name and then click **Connect**.

b. Click **Machine Info** in the left navigation pane.

c. Go to the **Remaining Life** section, click the **Reset** button to reset the Pick Up Roller counter.

d. Click **OK** to close the Remote Setup window.

- **ADS-4700W**

a. Press  [Settings] > [Machine Info.] > [Usage Counters].

b. Press [Roller Count].

c. When the LCD displays a confirmation message, press [Yes].

d. Press .

Pack and Ship Your Brother Machine

When you transport the machine, use the packing materials that came with your machine. If you do not pack the machine correctly, any damage that may occur in transit may not be covered by your warranty.

The machine should be adequately insured with the carrier.

1. Disconnect all the cables, and then unplug the power cord from the electrical socket.
2. Close the expandable ADF.
3. Remove the ADF (1).

4. Firmly push the Output Tray into the machine.

5. Wrap the machine in the original bag.

6. Pack the machine and the printed materials in the original carton with the original packing material as shown.
(The original packing material may differ depending on your country.)

7. Close the carton and tape it shut.

Add Shortcuts

Related Models: ADS-4700W/ADS-4900W

Use the Shortcuts feature to create shortcuts for frequently used operations, such as Scan to USB, Scan to Email Server, Scan to Network, and Scan to FTP/SFTP.

These instructions describe how to add a Scan to USB Shortcut. The steps for adding other 'Scan to' shortcuts are the same.

Before you add a shortcut for Scan to FTP/SFTP, Scan to Network, or Scan to SharePoint, make sure your network administrator adds your profile name and permissions in Web Based Management.

1. Press the [Basic 2], [Custom 1], [Custom 2], [Custom 3], [Custom 4], or [Custom 5] tab in the Home screen, and then press **+**.
2. Press **▲** or **▼** to display [to USB].
3. Press [to USB].
4. Press [Options].
5. Press **▲** or **▼** to display the available options for the setting, and then press the option you want.
If necessary, repeat these steps to add additional options.
6. Press [Save as Shortcut].
7. Press [OK].
8. Enter a name for the shortcut. Press [OK].

If you want to make this a One Touch Shortcut, follow the LCD instructions.

9. Press [OK].

Related Information

- [Save Your Favourite Settings as a Shortcut](#)

Change or Delete Shortcuts

Related Models: ADS-4700W/ADS-4900W

1. Press  [Settings] > [Shortcut Settings], and select the Shortcut you want to change.
2. Press [Edit].

- To delete the Shortcut, press [Delete] and follow the LCD.
- To edit the name of the Shortcut, press [Rename] and follow the LCD.

3. Press [Options].
4. Select the settings you want to change for the Shortcut.
5. Press [Save as Shortcut].
6. Press [OK] to confirm.

You will be asked if you want to make this a One Touch Shortcut. Follow the LCD instructions.

7. Press [OK].

- [Assign a Shortcut to an IC Card with IC Card Reader](#)

Assign a Shortcut to an IC Card with IC Card Reader

Related Models: ADS-4700W/ADS-4900W

You can assign one Shortcut to your IC card. When you touch your IC card to the IC card reader connected to your machine, your personal Shortcut automatically appears on the touchscreen.

- You cannot use the same IC card for different Shortcuts.
- To use the IC card for another Shortcut, unregister the card first, and then register it with the new Shortcut.

Before you assign a shortcut to an IC card, register an external IC card reader. Use Web Based Management to register the card reader. Your machine supports external IC card readers supporting HID-class drivers.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Administrator** > **External Card Reader**.

Start from ≡, if the navigation menu is not shown on the left side of the screen.

5. Enter the necessary information, and then click **Submit**.
6. Connect the card reader to your machine.

7. If the Home screen appears, press a tab that contains the Shortcut you want to assign to your IC card.
8. Press and hold the Shortcut until the options appear.
9. Press ▲ or ▼ to display the [Register Card/NFC] option, and then press it.
10. Touch the IC card to the IC card reader connected to your machine.
11. Press [Register].

The Shortcut is assigned to the IC Card.

What is Web Based Management?

Web Based Management is a utility that uses a standard web browser to manage your machine using the Hyper Text Transfer Protocol (HTTP) or Hyper Text Transfer Protocol over Secure Socket Layer (HTTPS).

- We recommend Microsoft Internet Explorer 11.0 or later/Microsoft Edge for Windows, Safari 12.0 or later for Mac, Google Chrome™ for Android (4.x or later), and Google Chrome™/Safari for iOS (10.x or later). Make sure that JavaScript and Cookies are always enabled in whichever browser you use.
- Make sure your machine is On and connected to the same network as your computer, and that your network supports the TCP-IP protocol.
