IMPORTANT NOTE

- Most of the illustrations in this User's Guide show the MFC-8910DW.

Memory storage

Your menu settings are stored permanently, and in the event of a power failure will *not* be lost. Temporary settings (for example, Contrast, Overseas Mode) *will* be lost. Also, during a power failure the machine will retain the date and time and programmed fax timer jobs (e.g. Delayed Fax) for up to 60 hours. Other fax jobs in the machine's memory will not be lost.

Set Daylight Saving Time

You can set the machine to change for Daylight Saving Time. If you choose On, it will reset the time forward one hour and if you choose Off, it will reset the time backward one hour.

- 1 Press **Menu, 0, 2, 2**.
- 2 Press **▲** or **▼** to choose **On** or **Off**. Press **OK**.
- 3 Press **Stop/Exit**.

Ecology features

Toner Save

You can save toner using this feature. When you set Toner Save to *On*, prints appear lighter. The default setting is *Off*.

- 1 Press **Menu**, **1**, **4**, **1**.
- 2 Press **▲** or **▼** to choose *On* or *Off*. Press **OK**.
- 3 Press **Stop/Exit**.

Note

We do not recommend Toner Save for printing Photo or Greyscale images.

Sleep Time

The Sleep mode setting can reduce power consumption. When the machine is in Sleep mode (Power Save mode) it acts as though it is turned off. The machine will wake up and start printing when it receives a print job.

You can choose how long the machine must be idle before it goes into Sleep mode. When the machine receives a fax or a print job, the timer will be reset. The default setting is 3 minutes.

While the machine is in Sleep mode the LCD will show *Sleep*.

- 1 Press **Menu**, **1**, **4**, **2**.
- 2 Enter the length of time (0-90 minutes) the machine is idle before entering Sleep mode. Press **OK**.
- 3 Press **Stop/Exit**.

Deep Sleep mode

If the machine is in Sleep mode and does not receive any jobs for a certain length of time, the machine will go into Deep Sleep mode automatically and the LCD will show *Deep Sleep*. Deep Sleep mode uses less power than Sleep mode. The machine will wake up when it receives a fax or a print job.

Quiet mode feature

Quiet mode

The Quiet mode setting can reduce noise while printing. When Quiet Mode is turned **On**, the print speed becomes slower. The default setting is **Off**.

- 1 Press **Menu**, **1**, **5**.
- 2 Press **▲** or **▼** to choose **On** or **Off**. Press **OK**.
- 3 Press **Stop/Exit**.

LCD Contrast

You can change the contrast to make the LCD look lighter or darker.

- 1 Press **Menu**, **1**, **7**.
- 2 Press **►** to make the LCD darker. Or, press **◄** to make the LCD lighter. Press **OK**.
- 3 Press **Stop/Exit**.

Dial Prefix

The Dial Prefix setting will automatically dial a predefined number before every fax number you dial. For example: If your telephone system requires a 9 to dial an outside number use this setting to automatically dial 9 for every fax you send.

Setting up the prefix number

- 1 Press **Menu**, **0**, **6**.
(for New Zealand) Press **Menu**, **0**, **5**.
- 2 Enter the prefix number (up to 5 digits) on the dial pad.

- You cannot use ! with any other numbers or characters.
- If your telephone system requires a timed break recall (hookflash), press **Hook** to enter the break.
- If the pulse dialing mode is on, # and * are not available to use.

- 3 Press **Stop/Exit**.

Mode Timer

The machine has three mode keys on the control panel: **FAX**, **SCAN**, and **COPY**.

You can set how much time the machine takes after the last Copy or Scan operation to return to FAX mode. If you choose **Off**, the machine will stay in the mode you used last.

This setting also sets the time the machine will change from registered user to the Public mode when using Secure Function Lock. (See *Switching Users* >> page 9.)

- Scan ¹
- USB Direct
- Print ²
- Page Limit ³

¹ Scan includes scan jobs sent via Brother iPrint&Scan.

² Print includes print jobs via Google Cloud Print and Brother iPrint&Scan.

³ Page Limit is configured using Web Based Management.

This feature also prevents users from changing the default settings of the machine by limiting access to the user-defined Menu settings.

Before using the security features you must first enter an administrator password.

Access to restricted operations can be enabled by creating a restricted user. Restricted users must enter a password to use the machine.

Make a careful note of your password. If you forget it, you will have to reset the password stored in the machine. For information about how to reset the password call Brother Customer Service.

Note

- Secure Function Lock can be set manually at the control panel, or by using Web Based Management or BRAdmin Professional 3 (Windows® only). We recommend using Web Based Management or BRAdmin Professional 3 (Windows® only) to configure this feature. (►► Network User's Guide)
- Only administrators can set limitations and make changes for each user.
- When Secure Function Lock is on, you can only use 1.Contrast, 6.Pollled TX and 7.Coverpage under 2.Setup Send in the Fax menu.

- 2 Do one of the following:
 - To change more settings, press **1**. The LCD returns to the Setup Send menu so you can change another setting.
 - If you have finished changing settings, press **2** and go to the next step for sending your fax.

Contrast

For most documents the default setting of **Auto** will give the best results.

Auto automatically chooses a suitable contrast for your document.

If your document is very light or dark, changing the contrast may improve the quality of the fax.

Use **Dark** to make the faxed document lighter.

Use **Light** to make the faxed document darker.

- 1 Make sure you are in FAX mode .
- 2 Load your document.
- 3 Press **Menu**, **2**, **2**, **1**.
- 4 Press **▲** or **▼** to choose **Auto**, **Light** or **Dark**.
Press **OK**.

Note

Even if you choose **Light** or **Dark**, the machine will send the fax using the **Auto** setting if you choose **Photo** as the Fax Resolution.

The quality of a fax can be improved by changing the Fax Resolution. Resolution can be changed for the next fax or for all faxes.

To change the default Fax Resolution setting

- 1 Make sure you are in FAX mode .

S.Fine: Good for small print or artwork and transmits slower than **Fine** resolution.

Photo: Use when the document has varying shades of gray or is a photograph. This has the slowest transmission time.

The time taken to send will increase when selecting **S.Fine** or **Photo**.

Additional sending operations

Sending a fax manually

Manual transmission

Manual transmission lets you hear the dialling, ringing and fax-receiving tones while sending a fax.

- 1 Make sure you are in FAX mode .
- 2 Load your document.
- 3 Press **Hook** and listen for a dial tone. Or pick up the handset of an external telephone and listen for a dial tone.
- 4 Dial the fax number you want to call using the external telephone .
- 5 When you hear the fax tone, press **Start**.
 - If you are using the scanner glass, press **1** to send a fax.
- 6 Replace the handset of the external telephone.

Dual access

You can dial a number and start scanning the fax into memory—even when the machine is sending from memory, receiving faxes or printing PC data. The LCD will show the new job number.

The number of pages you can scan into the memory will vary depending on the data that is printed on them.

Note

If you get an **Out of Memory** message while scanning the first page of a fax, press **Stop/Exit** to cancel scanning. If you get an **Out of Memory** message while scanning a subsequent page, you can press **Start** to send the pages scanned so far, or press **Stop/Exit** to cancel the operation.

Broadcasting

Broadcasting lets you send the same fax message to more than one fax number. You can include Groups, One Touch, Speed Dial numbers and up to 50 manually dialled numbers in the same broadcast.

You can broadcast to 366 different numbers. This will depend on how many Groups, access codes or credit card numbers you have saved, and on how many delayed or stored faxes are in the memory.

Before you begin the broadcast

One Touch and Speed Dial numbers must be stored in the machine's memory before they can be used in a broadcast. (►► Basic User's Guide: *Storing One Touch Dial numbers* and *Storing Speed Dial numbers*)

Group numbers must also be stored in the machine's memory before they can be used in a broadcast. Group numbers include many previously stored One Touch Dial and Speed Dial numbers for easier dialling. (See *Setting up Groups for Broadcasting* ►► page 36.)

How to broadcast a fax

Note

Use (**Address Book**) to help you choose numbers easily.

- 1 Make sure you are in FAX mode .
- 2 Load your document.
- 3 Enter a number.
Press **OK**.
You can use either a One Touch, a Speed Dial, a Group number, or a number manually entered using the dial pad. (►► Basic User's Guide: *How to dial*)
- 4 Repeat step 3 until you have entered all the fax numbers you want to broadcast to.
- 5 Press **Start**.

After the broadcast is finished the machine will print a broadcast report to let you know the results.

Note

The scan profile of the One Touch, Speed Dial or Group number you chose first will be applied to the broadcast.

Cancelling a Broadcast in progress

While broadcasting you can cancel the fax currently being sent or the whole broadcast job.

- 1 Press **Menu**, **2**, **7**.
The LCD will display the Broadcast job number followed by the fax number or name being dialled (for example, #001 0123456789) and the broadcast job number (for example, Broadcast#001).

```
27.Remaining Jobs
▲ #001 0123456789
▼ Broadcast#001

Select ▲▼ or OK
```

- 2 Press **▲** or **▼** to choose one of the following:

 - Choose the broadcast job number, and press **OK**.

```
27.Remaining Jobs
Broadcast#001
▲ 1.Clear
▼ 2.Exit

Select ▲▼ or OK
```

- 3 Press **1** to cancel the fax number or Broadcast job number you chose in step 2, or press **2** to exit without cancelling.
If you chose to only cancel the fax currently being sent in step 2, the LCD will ask you if you want to cancel the broadcast job. Press **1** to clear the whole broadcast job or **2** to exit.

- 4 Press **Stop/Exit**.

Real Time Transmission

When you are sending a fax, the machine will scan the documents into the memory before sending it. Then, as soon as the telephone line is free, the machine will start dialling and sending.

Sometimes, you may want to send an important document immediately, without waiting for memory transmission. You can set **Real Time TX** to **On** for all documents or **Next Fax:On** for the next fax only.

Note

- If the memory is full and you are sending a fax from the ADF, the machine will send the document in real time (even if Real Time TX is set to Off). If the memory is full, faxes from the scanner glass cannot be sent until you clear some of the memory.
- In Real Time Transmission, the automatic redial feature does not work when using the scanner glass.

Options

Optional paper tray (LT-5400)

An optional lower tray can be installed on MFC-8510DN and MFC-8910DW, and it can hold up to 500 sheets of 80 gsm paper.

When an optional tray is installed, the machine can hold up to 800 sheets of plain paper.

For setup, see the Instructions that we have supplied with the lower tray unit.

WARNING

If you use a Lower Tray, DO NOT carry the machine with the Lower Tray as you may be injured or cause damage to the machine because it is not attached to the Lower Tray.

Memory board

MFC-8910DW has 128 MB of standard memory, and MFC-8510DN has 64 MB. Both models have one slot for optional memory expansion. You can increase the memory up to maximum of 384 MB for MFC-8910DW and 320 MB for MFC-8510DN by installing one SO-DIMM (Small Outline Dual In-line Memory Module).

SO-DIMM Types

You can install the following SO-DIMMs:

- 256 MB Kingston KTH-LJ2015/256
- 256 MB Transcend TS256MHP423A

Note

- For more information, visit the Kingston Technology website at <http://www.kingston.com/>.
- For more information, visit the Transcend website at <http://www.transcend.com.tw/>.

In general, the SO-DIMM must have the following specifications:

Type	144-pin and 16-bit output
CAS latency	4
Clock frequency	267 MHz (533 Mb/S/Pin) or more
Capacity	256 MB
Height	30.0 mm
DRAM type	DDR2 SDRAM

Note

- There might be some SO-DIMMs that will not work with the machine.
- For more information, call the dealer you bought the machine from or Brother Customer Service.

Installing extra memory

- 1 Turn off the machine's power switch. Unplug the telephone line cord.
- 2 Disconnect the interface cable from the machine, and then unplug the power cord from the electrical socket.

Note

Be sure to turn off the machine's power switch before you install or remove the SO-DIMM.

- 3 Remove the plastic (1) and then metal (2) SO-DIMM covers.

- 4 Unpack the SO-DIMM and hold it by its edges.

Important

To prevent damage to the machine from static electricity, DO NOT touch the memory chips or the board surface.

- 5 Hold the SO-DIMM by the edges and align the notches in the SO-DIMM with the protrusions in the slot. Insert the SO-DIMM diagonally (1), then tilt it toward the interface board until it clicks into place (2).

- 6 Put the metal (2) and then the plastic (1) SO-DIMM covers back on.

B

- 7 Plug the machine's power cord back into the electrical socket first, and then connect the interface cable.
- 8 Plug in the telephone line cord. Turn on the machine's power switch.

Note

To make sure that you have installed the SO-DIMM correctly, you can print the User Setting List that shows the current RAM SIZE. (See *How to print a report* >> page 45.)

This is a comprehensive list of features and terms that appear in Brother manuals. Availability of these features depends on the model you purchased.

ADF (automatic document feeder)

The document can be placed in the ADF and scanned one page at a time automatically.

Auto Reduction

Reduces the size of incoming faxes.

Automatic fax transmission

Sending a fax without picking up the handset of the external telephone or pressing **Hook**.

Automatic Redial

A feature that enables your machine to redial the last fax number after five minutes if the fax did not go through because the line was busy.

Backup Print

Your machine prints a copy of every fax that is received and stored in memory. This is a safety feature so you will not lose messages during a power failure.

Batch Transmission

As a cost saving feature, all delayed faxes to the same fax number will be sent as one transmission.

Beeper Volume

Volume setting for the beep when you press a key or make an error.

Broadcasting

The ability to send the same fax message to more than one location.

Cancel Job

Cancels a programmed print job and clears it from the machine's memory.

CNG tones

The special tones (beeps) sent by fax machines during automatic transmission to tell the receiving machine that a fax machine is calling.

Coding method

Method of coding the information contained in the document. All fax machines must use a minimum standard of Modified Huffman (MH). Your machine is capable of greater compression methods, Modified Read (MR), Modified Modified Read (MMR) and JBIG, if the receiving machine has the same capability.

Communication error (or Comm. Error)

An error during fax sending or receiving, usually caused by line noise or static.

Compatibility group

The ability of one fax unit to communicate with another. Compatibility is assured between ITU-T Groups.

Contrast

Setting to compensate for dark or light documents, by making faxes or copies of dark documents lighter and light documents darker.

Delayed Fax

Sends your fax at a specified later time that day.

Distinctive Ring

A subscriber service purchased from the telephone company that gives you another telephone number on an existing telephone line. The Brother machine uses the new number to simulate a dedicated fax line.

Dual Access

Your machine can scan outgoing faxes or scheduled jobs into memory at the same time it is sending a fax or receiving or printing an incoming fax.

ECM (Error Correction Mode)

Detects errors during fax transmission and resends the pages of the fax that had an error.

Extension telephone

A telephone on the fax number that is plugged into a separate wall socket.

External phone

A TAD (telephone answering device) or telephone that is connected to your machine.

F/T Ring Time

The length of time that the Brother machine fast double-rings (when the Receive Mode setting is Fax/Tel) to notify you to pick up a voice call that it answered.

Fax Ability (New Zealand only)

A subscriber service purchased from the telephone company that provides another telephone number on an existing telephone line. The brother fax machine uses the new number to simulate a detected fax line.

Fax Detect

Enables your machine to respond to CNG tones if you interrupt a fax call by answering it.

Fax Forwarding
