Printing photos from a memory card or USB Flash memory drive (MFC-J625DW and DCP-J725DW only)

PhotoCapture Center™ operations

Memory cards, USB Flash memory drive and folder structures

Your machine is designed to be compatible with modern digital camera image files, memory cards and USB Flash memory drives; however, please read the points below to avoid errors:

- The image file extension must be .JPG (other image file extensions like .JPEG, .TIF, .GIF and so on will not be recognized).
- Direct PhotoCapture Center™ printing must be performed separately from PhotoCapture Center™ operations using the PC. (Simultaneous operation is not available.)
- The machine can read up to 999 files ¹ on a memory card or USB Flash memory drive.
 - ¹ The folder inside memory cards or USB Flash memory drive is also counted.
- The DPOF file on the memory cards must be in a valid DPOF format. (See *DPOF printing* >> page 41.)

Please be aware of the following:

- When printing an index or image, the PhotoCapture Center™ will print all the valid images, even if one or more images have been corrupted. Corrupted images will not be printed.
- (memory card users)

Your machine is designed to read memory cards that have been formatted by a digital camera.

When a digital camera formats a memory card it creates a special folder into which it copies image data. If you need to modify the image data stored on a memory card with your PC, we recommend that you do not modify the folder structure created by the digital camera. When saving new or modified image files to the memory card, we also recommend you use the same folder your digital camera uses. If the data is not saved to the same folder, the machine may not be able to read the file or print the image.
- (USB Flash memory drive users)

This machine supports USB Flash memory drives that have been formatted by Windows®.

Packing and shipping the machine

When you transport the machine, use the packing materials that came with your machine. Follow the instructions below to correctly package your machine. Damage caused to your machine during transit may not be covered by your warranty.

! IMPORTANT

It is important to allow the machine to “park” the print head after a print job. Listen carefully to the machine before unplugging it to make sure that all mechanical noise has stopped. Not allowing the machine to finish this process may lead to print problems and possible damage to the print head.

- 1 Open the ink cartridge cover.
- 2 Remove all four ink cartridges. Press the ink release lever above each cartridge to release it.
(➤➤Basic User's Guide: *Replacing the ink cartridges*)
- 3 Install the orange protective part and then close the ink cartridge cover.

- If you are not able to find the orange protective part, ship the machine without it. DO NOT install the ink cartridges as an alternative before shipping.

- Lift the machine from the front and hook the tab of the orange protective part into the keyed opening (1) on the bottom of the paper tray. Then latch the protective part over the raised portion of the paper tray (2).

- Unplug the machine from the telephone wall socket and take the telephone line cord out of the machine.
- Unplug the machine from the electrical socket.
- Using both hands, use the plastic tabs on both sides of the machine to lift the scanner cover into the open position. Then unplug the interface cable from the machine, if it is connected.
- Using both hands, grasp the plastic tabs on both sides of the machine and gently close the scanner cover.
